

Customer Setting Permissions to Reservations

Type:	4. Instructions	Version:	1.0
Status:	Final	Effective:	12/15/2023

1. Purpose

To provide instructions for an end user to set RBAC (role-based access control) permission on Azure Reservations after the ordering process is completed.

Note: Reservations are not resources under the Azure subscription, they are tenant level resources with their own Azure RBAC permission separate from subscriptions. Reservations do not inherit permissions from Azure subscriptions.

3. Instructions

These instructions must be performed by an user who is a member of the tenant Active Directory and who is a Global Administrator.

1. Elevate access to provide User Access Management to the tenant.

Note: Refer to the Tech Note - Elevated Global Admin for instructions on how a global admin can elevate their access.

2. Log out of the account.
3. Log back into Azure Portal as the global administrator with elevated permissions.
4. Navigate to the [Reservations](#) blade by searching for Reservations or selecting it from All Services.
5. In the list of Reservations, edit the Reservation by clicking on its name.
6. Select Access Control (IAM) -> Role Assignment -> +Add -> Add Role Assignment.

7. Select the role to be provided and the member or group you wish to Add.

Note: This will need to be repeated for each reservation.

Note: It is recommended to set at least one user with a minimum of the Reservations Administrator role so a Reservation scope can be changed if necessary.

4. Definitions

Term	Definition
Reservation	Azure Reservations are a way to save money on Azure services by committing to one-year or three-year plans for multiple products, which can significantly reduce resource costs.
Savings Plan	Azure Savings Plans are a flexible pricing model that provides savings off pay-as-you-go pricing when committing to spend a fixed hourly amount on compute services for one or three years.
