3. Policy

A capability exists in the CSP program for the indirect provider to allow a reseller/end user to purchase reservations and/or savings plans through the Azure portal. TD SYNEX does not support this feature for end user tenants; however, resellers are able to purchase reservations through our eCommerce platforms for their end user customers.

Should TD SYNEX enable the ability to purchase reservations or savings plans, there is no method to restrict who can make purchases. End user customers with access would be able to make purchases themselves.

The purchase process of reservations or savings plans in Azure portal is not clear. It is possible and likely mistakes will be made by customers purchasing their own reservations/savings plans. Especially with savings plans it is possible to accidentally purchase a savings plan costing the customer thousands of dollars per month.

Microsoft has specific documented rules around cancellations, and they have been unwilling to provide out of policy cancellations.

- Savings plans may not be cancelled or changed after purchase, even if purchased by mistake.
- Reservations are limited to \$50K in cancellations in a rolling 12-month period. When the limit is reached, no additional cancellations are possible.

The reseller would be responsible for all charges even if the end user customer refused to pay the cost of the reservations or transferred their subscriptions to another provider.
