1. Purpose

The process to transfer a Direct EA subscription to CSP is different than the process used to transfer other subscriptions. The process is initiated by the CSP Indirect Provider from the Cost Management + Billing blade in Azure Portal.

IMPORTANT: End user customers identified by Microsoft as Strategic (S500) or with more than $1M ACR cannot transfer without whitelisting and approval from their Microsoft account executive.

IMPORTANT: Indirect EAs transfers using this process is not supported.

2. Process

1.	(END USER)	Establish AOBO/Delegated admin per Section 5.0
2.a	(RESELLER)	Create an Azure Plan in Stellr per Section 8.0 *(Preferred)*
		-OR-
2.b	(NEW CSP PROVDER)	Create an Azure Plan in Partner Center per Section 7.0
3.	(END USER/RESELLER)	Establish new CSP Provider's foreign principal per Section 6.0
4.	(CSP PROVIDER/END USER)	Determine if any quota increases have been made and add increases to new CSP subscription
5.	(CSP PROVIDER/END USER)	Complete transfer request per Section 4.0
6.	(RESELLER)	Explain the importance if the CSP Provider's foreign principal to the end user

3. Important Notes

- The transfer is not service affecting. It only changes billing. There is no overlap in billing.
- Indirect EA transfers are not supported by the tool. They must be done as a manual migration.
- Classic resources: Cannot move to a CSP subscription. All classic resources must be converted to ARM resources before attempting the transfer.
- Quota increases: Quotas in EA's are higher than in CSP. If the quota is increased by at least one more than the default in the EA it will transfer to the CSP. Otherwise, the quota will change to the CSP quantity, even if more is used than is available in the CSP subscription.

  For example, if the EA default is 350 then it will become 50 when moved to CSP. If the quota is changed to 351 in the EA then it will be 351 in the CSP.
- Azure Cost Management (ACM) Data: ACM data is tied to a billing scope. Although the data will exist in the tenant it will not be reportable in total. Separate reports must be run for before and after transition.
- Azure Cost Management (ACM) Scope: In CSP the highest reporting level is the subscription, it is not possible to run one report across all subscriptions. Each subscription must be reported on individually.
- Third-Party Cost Management: Some third-party cost management solutions may not have access to data after transition.
- Port 25: Email over port 25 is not supported in CSP subscriptions. If in use, it will no longer function. It cannot be enabled in CSP subscriptions.
- Prepaid Monetary Commitment: Cannot transfer to CSP; balance will remain in EA. Usage on CSP workloads will not decrement from EA Prepaid Monetary Commit.

Copyright © 2021. TD SYNNEX Corporation. All Rights Reserved.

- Azure Credit Offer: Cannot transfer to CSP; balance will remain in EA. Usage on CSP workloads will not decrease from EA Credit Offer.
- Commit to Consume: Any Azure consumption commitments (could be named Azure MACC, Azure Consumption Commitment, Microsoft Azure Commit to Consume, Commit to Consume, CTC, MACC Program, Microsoft Azure Consumption Commitments, M Acc, MACC) cannot be transferred to CSP. This may result in an invoice at the end of the commitment term if the total ACR misses the commitment.
- Azure Reserved Instances (RI): Reserved Instances may be eligible to be transferred to CSP if the country and billing currency are the same in the destination as the source. If the RI is not eligible to be moved, then this could result in reservation commitments to be unutilized.
- EA Custom Terms: Customization of the EA will not transfer to the CSP program. This may result in the loss of Azure Commitment Discounts, Azure Credit Offer (ACO) balances and End Customer Investment Funds (ECIF) investments which will not transfer. In addition, Security and Privacy Terms, and other concessions recorded in Cross Tenant Migration (CTM) amendments are not available in CSP as there is currently no capability for Microsoft Customer Agreement amendments in the CSP program.
- Support: Premier Support/Azure Pro Direct/Unified Support will remain in EA. These support offerings cannot be used in CSP and should be canceled.
- Dev/Test subscription types: CSP does not yet have Dev/Test subscription types.
- Marketplace items which are not available in CSP: Not all Marketplace items are available in CSP. Any subscriptions with Marketplace items not available in CSP will be blocked by the Transfer tool.
- Reversing the transition is not possible: Once a subscription has been transferred from EA to CSP through the Transfer tool, there is no automated process or tool available to move back to EA. The option to move back to EA will be through individual resource movement which would consume time, effort, and possible downtime.

4. Procedure

4.1. CSP Indirect Reseller

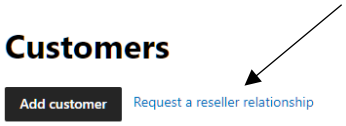

- Discuss the transfer with the end user customer.
- Obtain the subscription ids of the subscriptions to be transferred.
- Obtain the name and email address of the person responsible for the subscription at the end user company. This is the person who will receive the request. The person must be the EA Account Owner.
- Provide the information to the new CSP indirect provider.
- Inform the end user customer that they may receive a reseller relationship request from the new CSP indirect provider if they do not already have a relationship.
- Inform the end user customer that they will receive the subscription transfer request sent by the indirect provider.

4.2. CSP Indirect Provider

Partner Center

Copyright © 2021. TD SYNNEX Corporation. All Rights Reserved.

- The CSP Provider must have a reseller relationship with the end user before the process can start. If they do not have a reseller relationship, they will need to request one in Partner Center.

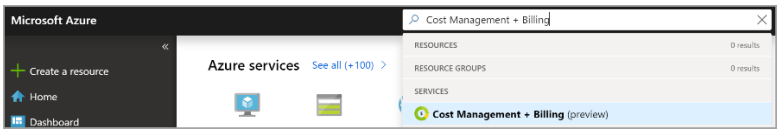

- In Partner Center, create a new Azure Plan, if one does not already exist. See Section 6.0 for instructions.

Note: An Azure Plan must exist before a transfer request may be initiated.

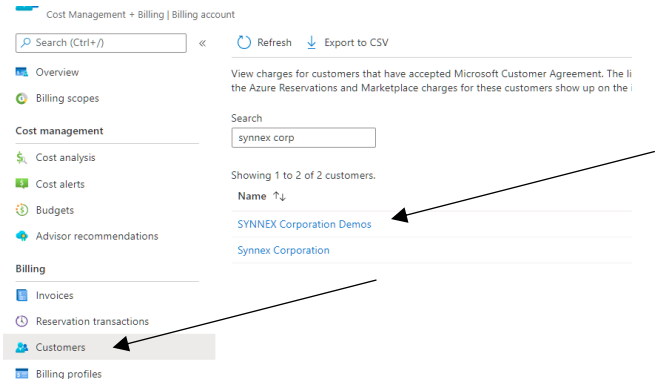

Note: Only one Azure Plan may exist per provider. Do not create a new one if one already exists.

Azure Portal

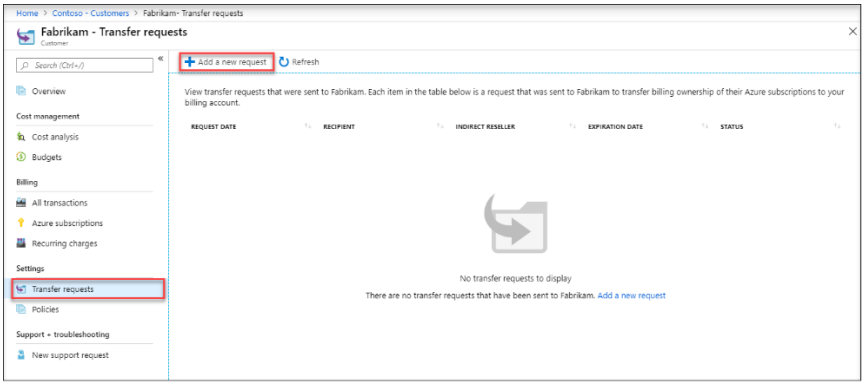

- Log into Azure portal using CSP Admin Agent credentials. You will need to be in the Synnex365 tenant, not the customer tenant.
- Search for the `Cost Management + Billing` blade

- Select `Customers` from the menu then select the customer from the list.

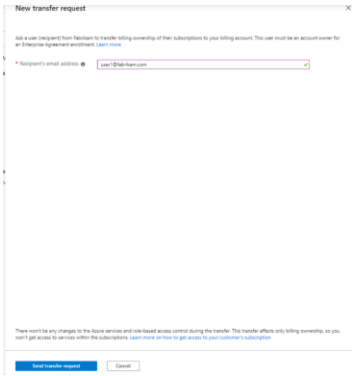

- Select `Transfer requests` then select `Add a new request`

Copyright © 2021. TD SYNNEX Corporation. All Rights Reserved.

- Enter the email address of the user in the customer organization who will accept the transfer request. The user must be an account owner (EA Administrator) on an Enterprise Agreement. Select `Send transfer request`.

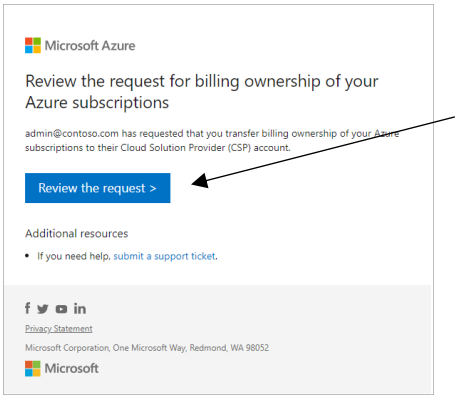

- An email will be sent to the end user with instructions on how to complete the transfer.

  Note: If the end user does not receive the email, you can find the link by clicking on the request in the portal. This is the same email that was emailed to them.

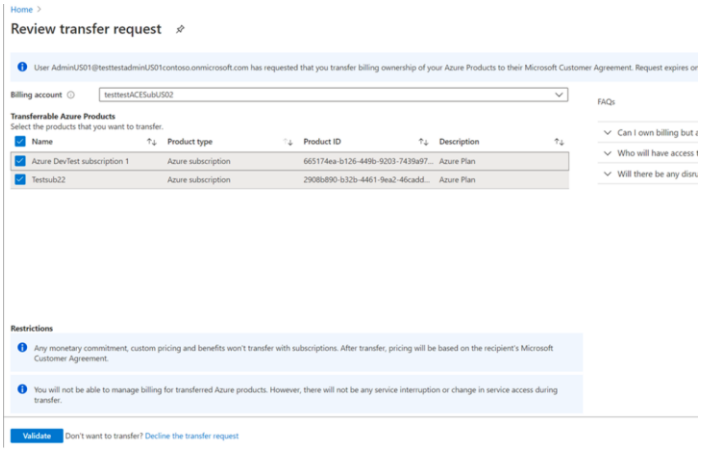

4.3. End User Customer

- The end user contact will receive an email asking them to transfer the subscription to TD Synnex.

- Click on the Review the request link in the email and log in using an administrator credential.
- Check the boxes next to the subscriptions to transfer then click `Validate`.

Copyright © 2021. TD SYNNEX Corporation. All Rights Reserved.

- The tool will validate the request and provide one of the following results for each subscription:

  Passed - Validation for this Azure product has passed and can be transferred.
  Warning - There's a warning for the selected Azure product. While the product can still be transferred, doing so will have some impact that the user should be aware of in case they want to take mitigating actions. For example, the Azure subscription being transferred is benefitting from an RI. After transfer, the subscription will no longer receive that benefit. To maximize savings, ensure that the RI is associated with another subscription that can use its benefits. Instead, the user can also choose to go back to the selection page and unselect this Azure subscription.
  Failed - The selected Azure product can't be transferred because of an error. The user will need to go back to the selection page and unselect this product to transfer the other selected Azure products.

- The Indirect Provider may now check the status in their Azure portal (Synnex365).

4.4. Final Steps

- The Indirect Reseller will not have Admin on Behalf Of (AOBO) access as part of the transfer, so they will need to follow the steps in Section 4 – Establishing Administration on Behalf Of (AOBO) below.
- The Indirect Provider and Indirect Reseller will not have access to the subscription and may need to follow the steps in Section 5 – Establishing the Foreign Principal below.
- The TD SYNNEX account manager will need to transfer the subscription into STELLR using the CSP Subscription Transfer tool. The foreign principal must be established before the subscription can be transferred.

5. Establishing a Reseller Relationship and Delegated Admin

- GDAP is not covered in this section.
- A global administrator of the tenant, whose login is a member of the tenant, will need to copy the following URL into a web browser then follow the prompts:

United States

Synnex

Copyright © 2021. TD SYNNEX Corporation. All Rights Reserved.

https://admin.microsoft.com/Adminportal/Home?invType=ResellerRelationship&partnerId=ff1b2576-d461-4916-97dc-7ada1cd798dc&msppId=0&DAP=true#/BillingAccounts/partner-invitation

TechData SCM

https://admin.microsoft.com/Adminportal/Home?invType=ResellerRelationship&partnerId=d5c77776-8b4c-4ceb-81da-566aba9c59c5&msppId=0&DAP=true#/BillingAccounts/partner-invitation

TechData SIE

https://admin.microsoft.com/Adminportal/Home?invType=ResellerRelationship&partnerId= d3e363db-81d0-4c04-9bb4-bced62c60825&msppId=0&DAP=true#/BillingAccounts/partner-invitation

Canada

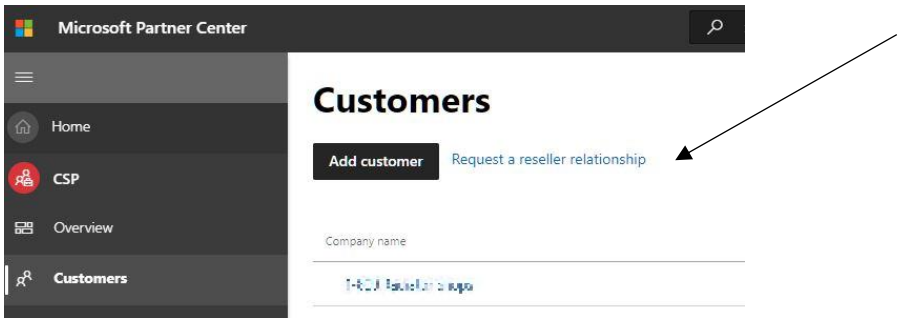

Synnex

https://admin.microsoft.com/Adminportal/Home?invType=ResellerRelationship&partnerId=47381036-1bd3-42d6-9a38-4a1651c1556b&msppId=0&DAP=true#/BillingAccounts/partner-invitation

TechData

- This will add permission to the tenant for TD Synnex; however, it will not provide access to subscriptions.
- The URL provided above comes from TD SYNNEX's Partner Center.

6. Establishing Administration on Behalf Of (AOBO) aka Foreign Principal

IMPORTANT: TD Synnex must have Delegated Administration (DAP) permissions before you can add our foreign principal. See Section 5.0 to add DAP.

IMPORTANT: Copy the script to Notepad and check for odd characters. Specifically check for the dash after "b13ae2dd". Acrobat often replaces it with another character.

- A user with Owner RBAC right to the subscription will need to run one of the following:

  UNITED STATES

Copyright © 2021. TD SYNNEX Corporation. All Rights Reserved.

Synnex (synnex365.com)

```
New-AzRoleAssignment -RoleDefinitionName "Owner" -ObjectId “b13ae2dd-2d47-4211-89de-5142f8368588” -ObjectType "ForeignGroup" -Scope "/subscriptions/<subscription_id>"
```

TechData SIE

```
New-AzRoleAssignment -RoleDefinitionName "Owner" -ObjectId “aa7face0-42ae-47f1-a752-776945feb7fc” -ObjectType "ForeignGroup" -Scope "/subscriptions/<subscription_id>"
```

TechData SCM

```
New-AzRoleAssignment -RoleDefinitionName "Owner" -ObjectId “9967c88e-30d5-476f-ab06-0b849ba52bde” -ObjectType "ForeignGroup" -Scope "/subscriptions/<subscription_id>"
```

CANADA

Synnex

```
New-AzRoleAssignment -RoleDefinitionName "Owner" -ObjectId “acd31259-050b-4f6d-a1ba-0fe854bb0181” -ObjectType "ForeignGroup" -Scope "/subscriptions/<subscription_id>"
```

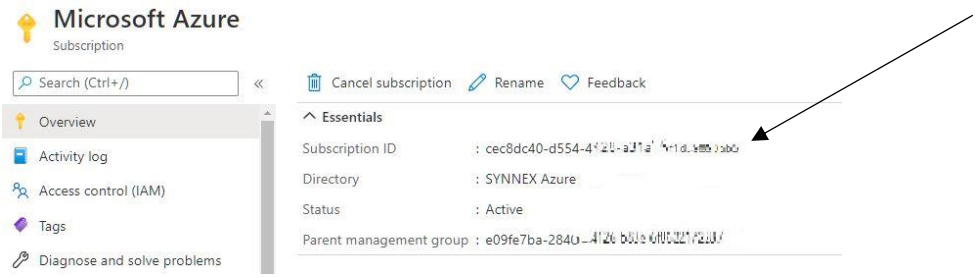

TechData SCM

```
New-AzRoleAssignment -RoleDefinitionName "Owner" -ObjectId “28965048-c414-4fdb-b297-6e1c0d373331” -ObjectType "ForeignGroup" -Scope "/subscriptions/<subscription_id>"
```

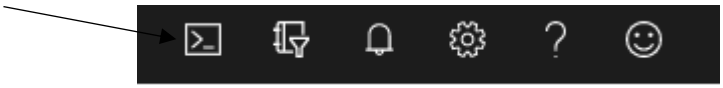

IMPORTANT: Replace <subscription id> with the customer’s subscription ID

- **This script will need to be run for each subscription that TD SYNNEX will be taking over.**
- The reseller will not get a discount (Partner Earned Credit) on a subscription unless this script is run.
- The script may be run using the cloud shell:
    - Log into the Azure portal and select the tenant containing the subscription
    - Select the subscription and obtain the subscription id from the Subscription blade

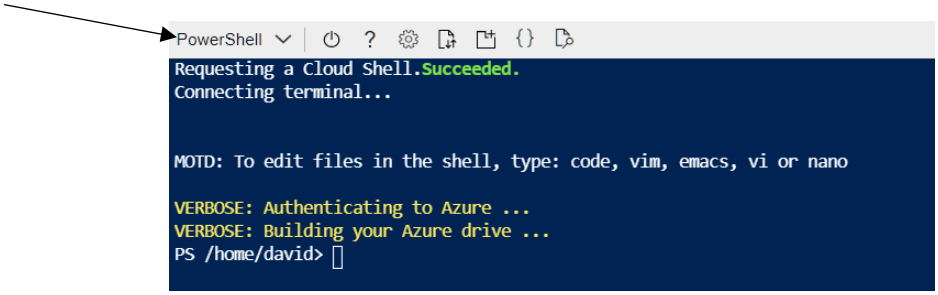

Copyright © 2021. TD SYNNEX Corporation. All Rights Reserved.

- Replace <subscription id> in the script with the subscription id from the portal. Make sure you replace the < and the > too.
- Start Cloud Shell by clicking on the icon in the portal.

- When you start Power Shell for the first time, you will need to set up a Storage account for it to use.
- Confirm that you are in the correct shell: PowerShell or Bash. If you want to use the Power Shell command, you need to be in PowerShell and if you want to use the Azure CLI command, you can switch to Bash or execute “az” in PowerShell first.

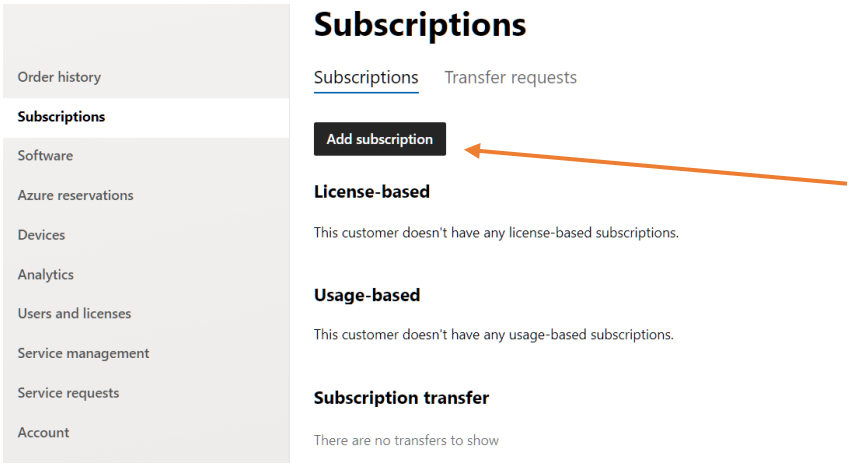

- Paste the command from above into the shell. You will need to right click in the shell then click “Paste” to paste the command.
- Press enter to submit the command.
- The shell will process the command then provide a success or failure message. If the command failed, you may contact the TD SYNNEX DSE team for assistance.
- Close the shell window by clicking the X in the upper right corner of the shell window.

7. Create An Azure Plan in Partner Center

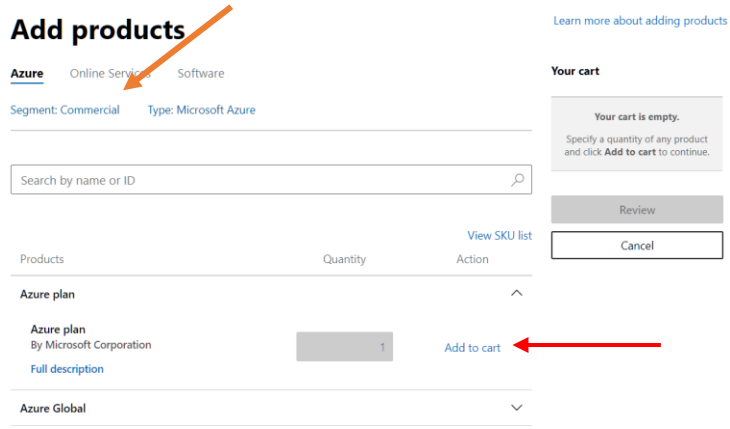

Note: The normal process is to create Azure Plans in the STELLR portal. Alternatively, the Azure Plan may be created in Partner Center by a DSE. If created in Partner Center, the AM will need to sync it to Stellr.

- Log into Partner Center and find the customer under CSP -> Customers
- Click on Subscription

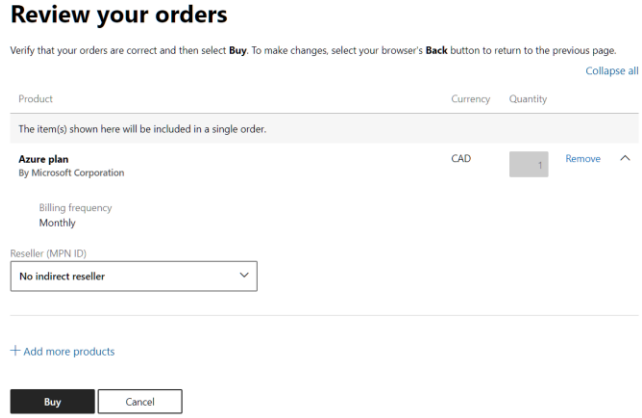

Copyright © 2021. TD SYNNEX Corporation. All Rights Reserved.

- Click on Add Subscription
- On the Add Products screen, select Azure -> Segment: Commercial -> Type: Microsoft Azure

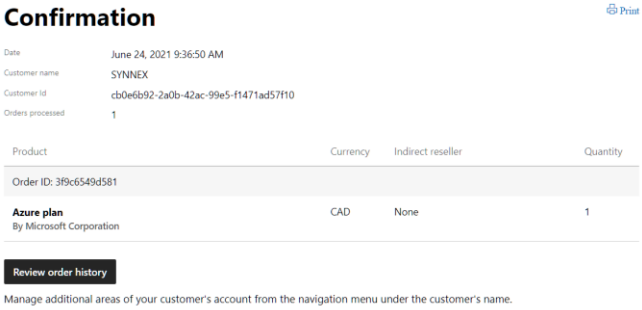

- Expand Azure Plan then click Add to cart
- After you click Add to cart, the Review button will enable.
- Click Review. The system will process before a new screen appears.

- Under Reseller MPN ID, select the reseller from the list or select Enter MPN ID from the list to add the reseller.

Copyright © 2021. TD SYNNEX Corporation. All Rights Reserved.

- Click Buy. The system will process before a new screen appears.

- After the Confirmation screen appears, the Azure Plan will be available under Subscriptions.

8. Create An Azure Plan in Stellr

The Reseller can create the Azure Plan following the same process they use for creating a new Azure Plan for a new customer. They may contact their TD Synnex Account Manager for instruction on how to use the Stellr Portal.

9. Associated Documents

- Transfer Azure product billing ownership to your Microsoft Partner Agreement (MPA)
- Transfer Azure subscriptions between subscribers and CSPs
- Obtain Delegated Admin Privileges from Customer
- Reinstate Admin Privileges for a Customer's Azure CSP Subscriptions
- Using Azure Cloud Shell
- Create An Azure Plan in Partner Center
- Partner Earned Credit Overview
- Partner Earned Credit Calculation
- Partner Earned Credit - Permissions

10. Document Approval

This document has been approved by:

- Manager, Cloud Sales Engineering

11. Document Revision History

Number	***Effective Date***	***Revision History***	***Author***
1.0	11/18/2020	Initial Draft	David Bloom
