3.1. Azure Pre-Purchase Plans (P3)

Azure Pre-Purchase Plans help customers save on their Azure spend on certain services when pre-purchasing commit units (CUs) for one or three years. There's no ratio on which the CUs are applied. CUs are equivalent to the purchase currency value and are deducted at retail prices. Like other reservations, the benefit of a prepurchase plan is discounted pricing by committing to a purchase term. The more you buy, the larger the discount you receive.

Unlike compute reservations, the pre-purchased units don't expire on an hourly basis, and you use them at any time during the term of the purchase.

Pre-Purchase Plans (P3) offer varied savings, determined by the pre-purchase tier. For example, the Defender for Cloud P3 1-year offers a 10% discount for 5,000 DCUs, a 12% discount for 10,000 DCUs, and a 14% discount 25,000 DCUs.

Combining tiers does not result in additional savings.

When the P3 has exhausted all of the CUs, billing for the applicable services will be charged at the Pay as You Go rate.

3.2. Current Pre-Purchase Plans Available for Purchase

- Azure Databricks (DBCUs)
- Azure Synapse Analytics (SCUs)
- Copilot Credits (CCCUs)
- Github (GCU)
- Github AI Credit (GHAICCU)
- Microsoft Agent (ACUs)
- Microsoft Defender for Cloud (DCUs)
- Microsoft Sentinel (SCUs)

3.3. Determining the right Pre-Purchase Plan (P3) to Buy

Each commit unit (CU) is equal to one dollar of spend of the associated service. The eligible service charges are billed at the MSRP rate and deducted from the P3 plan automatically. Usage is deducted from the CUs at a ratio matching the list price of the service.

For example, with the Defender for Cloud 5,000 DCU tier, you have \$5,000 of Defender for Cloud spend that will deduct from this pool of DCUs. The current cost for Defender for Servers Plan 2 is \$1460 per month, or 14.6 DCUs. Each server running Defender for Servers Plan 2 would result in a deduction of 14.6 DCUs from the pool of DCUs.
