1. Purpose

The process to transfer a New Azure Plan subscription from one CSP to another is different than the process that was used with Legacy Plans. The process is initiated by the new CSP Indirect Provider and does not require a form or support ticket. It is completed in Partner Center.

2. Process

1.	(END USER)	Establish a reseller relationship per Section 4.0
2,	(END USER/RESELLER)	Establish GDAP per Section 5.0
3.a	(RESELLER)	Create an Azure Plan in Stellr per Section 10.0 *(Preferred)*
		-OR-
3.b	(NEW CSP PROVDER)	Create an Azure Plan in Partner Center per Section 8.0
4.	(END USER/RESELLER)	Establish new CSP Provider's foreign principal/AOBO per Section 6.0
5.	(CSP PROVIDERS/RESELLER	Complete transfer request per Section 3.0
6.	(RESELLER)	Explain the importance if the CSP Provider's foreign principal to the end user
7.	(END USER/RESELLER	Remove the old CSP Provider's delegated admin in M365 admin center, if appropriate
8.	(END USER/RESELLER)	Remove the old CSP Provider's foreign principal per Section 7.0

NOTE: Removing the old provider if they no longer have a relationship with the end user should be considered critical. If access remains, the old provider can cancel the end user subscriptions. Many providers have automation that cancels subscriptions that they do not have in their billing systems. This has happened to a number of end users.

3. Procedure

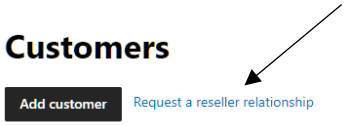

3.1. CSP Indirect Reseller

- If the current reseller is a Direct Provider, review Switch direct-bill partner to indirect reseller
    - The direct-to-indirect tool only works for Azure Plan and NCE MWP. It does not work for legacy Azure.
    - The traditional CSP-to-CSP process will work for direct-to-indirect.
- Discuss the transfer with the end user customer. The current indirect reseller will need to contact the current indirect provider to inform them that a transfer request will be coming.
    - If the indirect reseller is changing as well, the end user customer will need to have the conversation with the current indirect reseller.
- Provide the subscription ids of the subscriptions to be transferred to the current indirect provider if all subscriptions are not to be moved.
- Obtain the name and email address of the person responsible for the subscription at the end user company.
- Obtain the partner name and Microsoft ID/Directory ID/Tenant ID (not MPN) of the current indirect provider.
    - The Microsoft ID must be the one associated to the tenant used for CSP customers.
- Provide the information to the new CSP indirect provider.
- Inform the end user customer that they may receive a reseller relationship request from the new CSP indirect provider if they do not already have a relationship.
- Inform the end user customer that they will receive a copy of the subscription transfer request sent by the new indirect provider to the current indirect provider.

3.2. New CSP Indirect Provider

- The new partner must have a reseller relationship with the end user before the process can start. If they do not have a reseller relationship, they will need to request one in Partner Center.

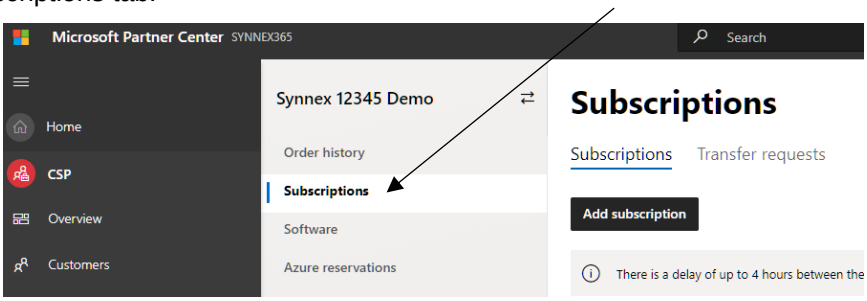

- In Partner Center, create a new Azure Plan, if one does not already exist. See Section 8.0 for instructions.

  Note: An Azure Plan must exist before a transfer request may be initiated.

  Note: Only one Azure Plan may exist per provider. Do not create a new one if one already exists.

- In Partner Center, under the end user customer that they want to transfer, select the Subscriptions tab.

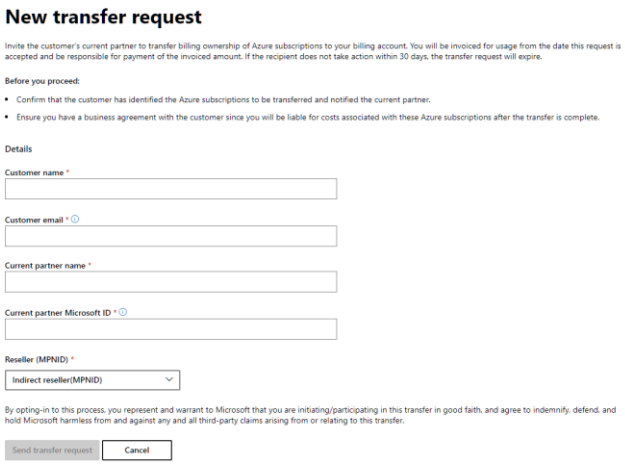

- Click `Transfer Request` then `Add new request`.

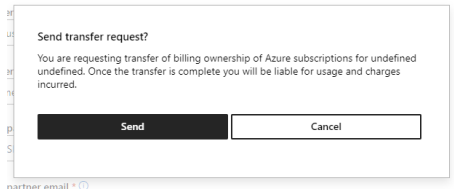

- Complete the New Transfer Request using the information provided by the new indirect reseller then click `Send Transfer Request` at the bottom of the page.

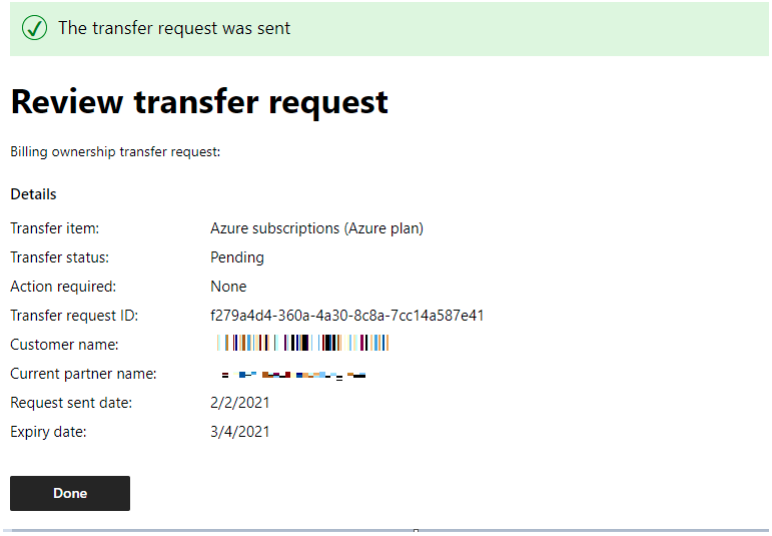

Copyright © 2020. TD SYNNEX Corporation. All Rights Reserved.

- Click Send in the pop up

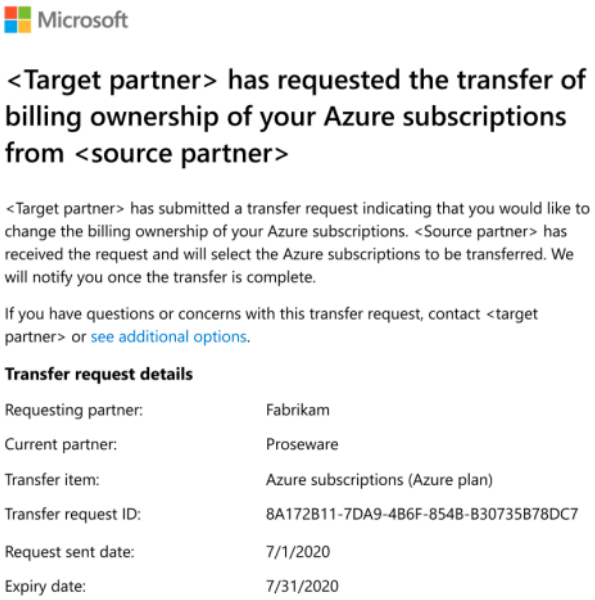

- You will be provided a confirmation. Click Done

- An email will be sent to the end user customer and the current indirect provider similar to the following.

Copyright © 2020. TD SYNNEX Corporation. All Rights Reserved.

Microsoft

<Target partner> has requested the transfer of billing ownership of your Azure subscriptions from <source partner>

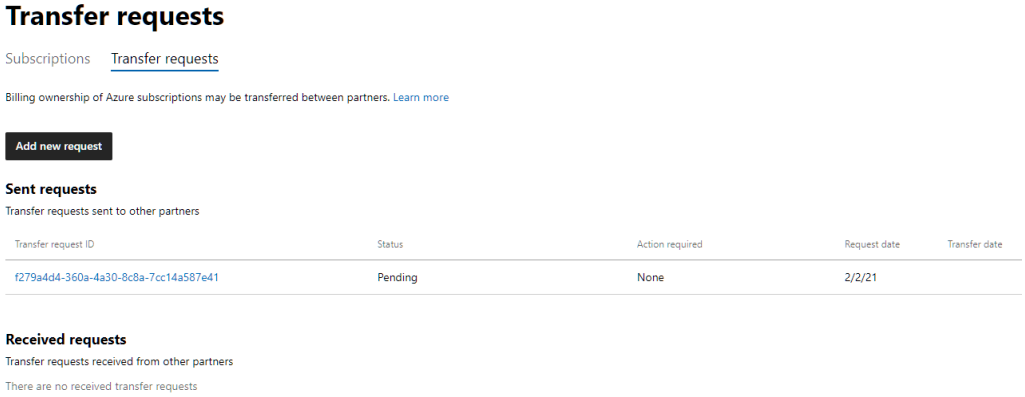

<Target partner> has submitted a transfer request indicating that you would like to change the billing ownership of your Azure subscriptions. <Source partner> has received the request and will select the Azure subscriptions to be transferred. We will notify you once the transfer is complete.

If you have questions or concerns with this transfer request, contact <target partner> or see additional options.

Transfer request details

Requesting partner:	Fabrikam
Current partner:	Proseware
Transfer item:	Azure subscriptions (Azure plan)
Transfer request ID:	8A172B11-7DA9-4B6F-854B-B30735B78DC7
Request sent date:	7/1/2020
Expiry date:	7/31/2020

- The current indirect provider will have 30 days to process the request, or it will expire and have to be resubmitted.
- The indirect reseller will need to follow up with the customer and/or current indirect provider to ensure the transfer is completed.
- Request status may be viewed in Partner Center

Received requests

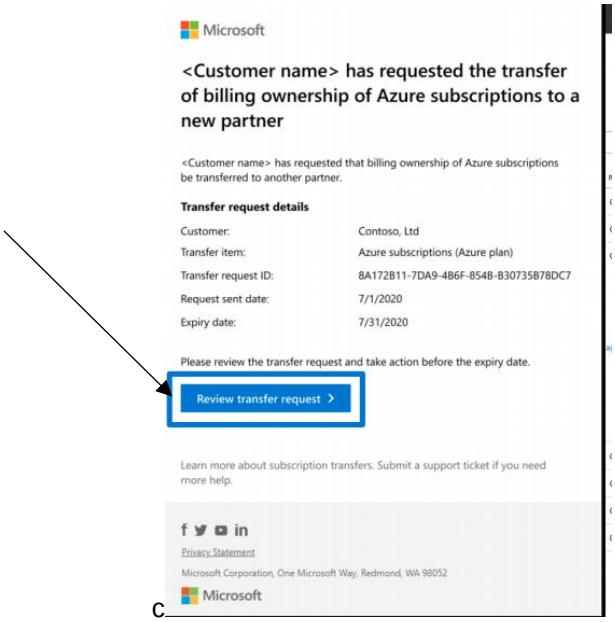

Transfer requests received from other partners

There are no received transfer requests

3.3. Current CSP Indirect Provider

- Click Review Transfer Request in the email notification.

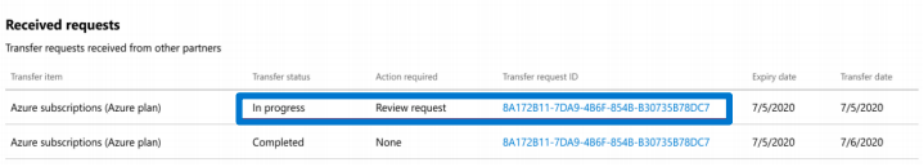

Copyright © 2020. TD SYNNEX Corporation. All Rights Reserved.

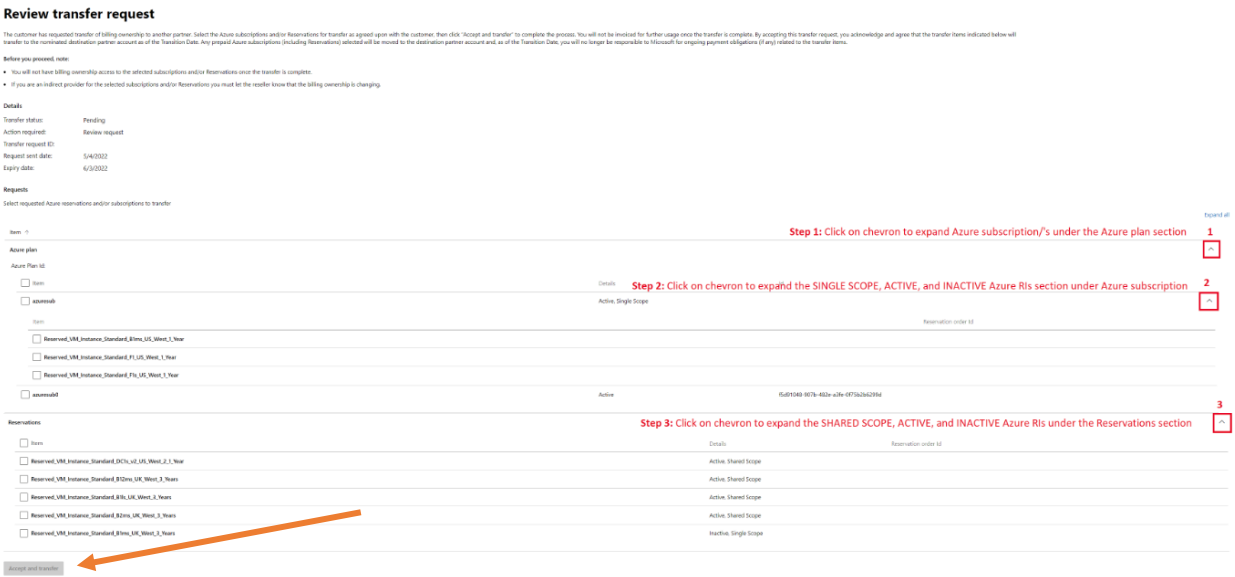

c

- Alternatively, they can go to the customer in Partner Center and look at `Received Requests` under `Transfer Request.`

- Click on the `Transfer Request Id` to view the request.

- Select the subscriptions and/or Reservations to be transferred then click `Accept and Transfer`.

Copyright © 2020. TD SYNNEX Corporation. All Rights Reserved.

Note: Both active and inactive reservations will appear in the transfer wizard, and partners should only select the active ones. Otherwise, the transfer request cannot be accepted. A Source partner is allowed to transfer only active Azure subscriptions and RIs (single and shared scope).

- The end user customer and now former CSP Indirect Partner will receive an email letting them know the transfer has been completed.

3.4. Final Steps

- The new Indirect Provider will not have Admin on Behalf Of (AOBO) access as part of the transfer, so they will need to follow the steps in Section 6 – Establishing Administration on Behalf Of (AOBO) below.
- A new Indirect Reseller will not have access; however, if the Indirect Reseller has not changed, their access will remain unchanged. The new Indirect Provider will need to establish access.
- The new Indirect Reseller or end user will need to remove permissions from the former Indirect Provider.
- The TD SYNNEX account manager will need to transfer the subscription into the eComm platform. The foreign principal must be established before the subscription can be transferred.

4. Establishing a Reseller Relationship

- See “Tech Note – TD SYNNEX’s Reseller Relationship Links” for more information.

5. Establishing Granular Delegated Admin Permissions (GDAP)

- GDAP is requested from within the StreamOne platform.
- After a GDAP relationship is requested, the end user must complete it by following the link sent to the global administrator.
- It can take up to 48 hours for a GDAP relationship to complete after the end user accepts the relationship.

CAUTION: Do not remove the current CSP Reseller or CSP Provider as may affect your subscriptions and costs.

6. Establishing the Administration on Behalf Of (AOBO) aka Foreign Principal

IMPORTANT: TD SYNNEX must have a reseller relationship with the end user before you can add our foreign principal. See Section 4.0.

- See “Tech Note – Add AOBO to a Subscription for TD SYNNEX” for more information.

7. Removing the Foreign Principal

- See “Tech Note – Add AOBO to a Subscription for TD SYNNEX” for more information.

  CAUTION: Do not remove the current CSP Provider. Removing the current provider may affect support and cost.

8. Create An Azure Plan in Partner Center

Note: The normal process is to create Azure Plans in the STELLR portal. Alternatively, the Azure Plan may be created in Partner Center by a DSE. If created in Partner Center, the AM will need to sync it to Stellr.

- Log into Partner Center and find the customer under CSP -> Customers
- Click on Subscription

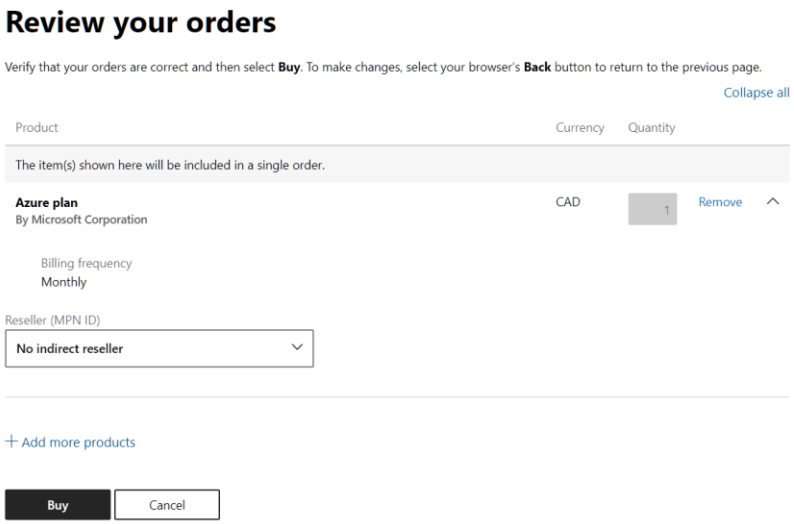

- Click on Add Subscription
- On the Add Products screen, select Azure -> Segment: Commercial -> Type: Microsoft Azure

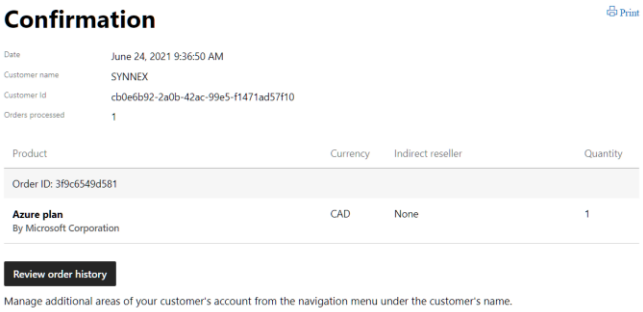

- Expand Azure Plan then click Add to cart
- After you click Add to cart, the Review button will enable.
- Click Review. The system will process before a new screen appears.

Copyright © 2020. TD SYNNEX Corporation. All Rights Reserved.

- Under Reseller MPN ID, select the reseller from the list or select Enter MPN ID from the list to add the reseller.
- Click Buy. The system will process before a new screen appears.

- After the Confirmation screen appears, the Azure Plan will be available under Subscriptions.

9. Reservations

As part of the transfer, eligible reservations may transfer to the new CSP.

- After a transfer of upfront paid Reservations, the customer will not be able to cancel those reservations.
- If the billing currency new partner is different than the current partner, the Azure reserved instance will be canceled at the start of the next billing cycle (applicable to reservations not paid upfront). In order to continue service, the reseller will need to repurchase the Azure reserved instance.
- The current partner must include the reservations when completing the transfer. The new partner does not need to separately request the reservations.

10. Create An Azure Plan in Stellr

The Reseller can create the Azure Plan following the same process they use for creating a new Azure Plan for a new customer. They may contact their TD Synnex Account Manager for instruction on how to use the Stellr Portal.
