

1. Purpose

Define the process to Azure Support Tickets.

Note: In the CSP program resellers and end user customers are not able to open support tickets with Microsoft. The CSP Direct/Indirect partner must open support tickets from the Azure portal.

3. Prerequisites

- 1) TD SYNEX must have AOBO for the subscription with the Owner or Support Request Contributor role. See the Tech Note - Add AOBO to Subscription for more information.
- 2) The subscription must be included in the user's global filter. See Tech Note - Filtering Subscriptions in Azure Portal for more information.
- 3) For some support tickets, TD SYNEX must have at least the Directory Reader Azure AD role via GDAP. This applies to most requests involving Azure AD.
- 4) TD SYNEX must be able to access the customer tenant since tickets are raised from within the Azure Portal. If TD SYNEX is blocked by Conditional Access, tickets cannot be created. See Tech Note - Exclude TD Synnex from Conditional Access for instructions on how to exclude TD SYNEX from Conditional Access policies.
- 5) The user opening the support case must be a member of the AdminAgents group in the PAC in which the subscription is managed. End users and resellers cannot open support cases.

4. Instructions

There are multiple ways to open a support case for an end user tenant. This tech note will describe three options.

4.1. Partner Center Service Management Screen

IMPORTANT: This method only works with full admin credentials. If we have limited GDAP permissions you will need to use another method.

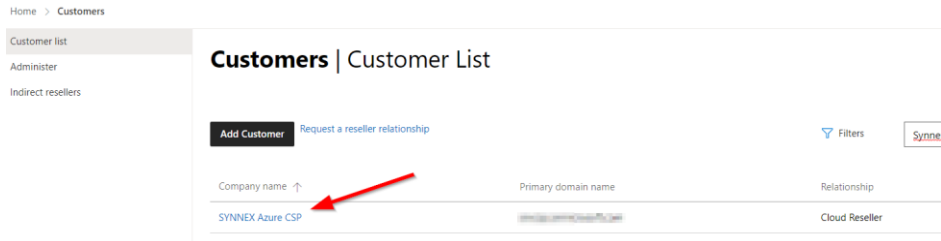

- Log into [Partner Center](#) using a credential with AdminAgent permissions.

Opening Azure Support Tickets

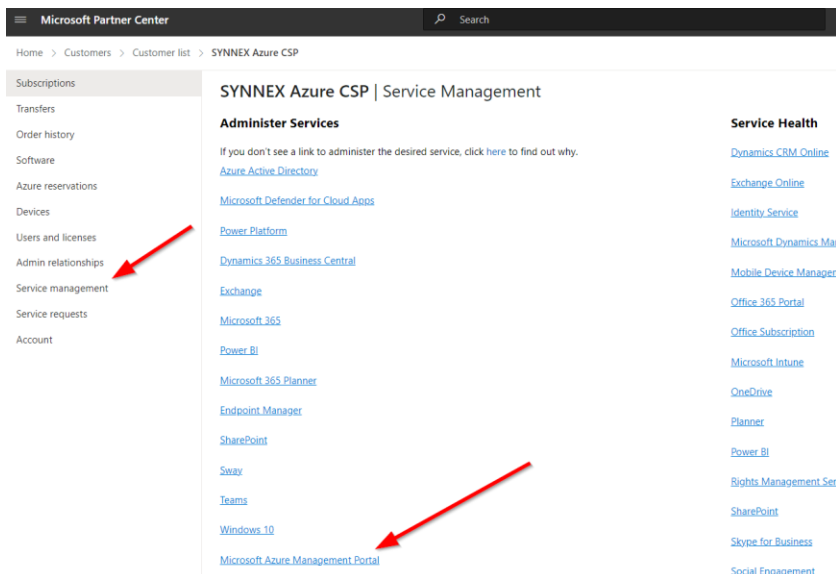

Type:	4. Instruction	Version:	2.0
Status:	Final	Effective:	7/18/2023

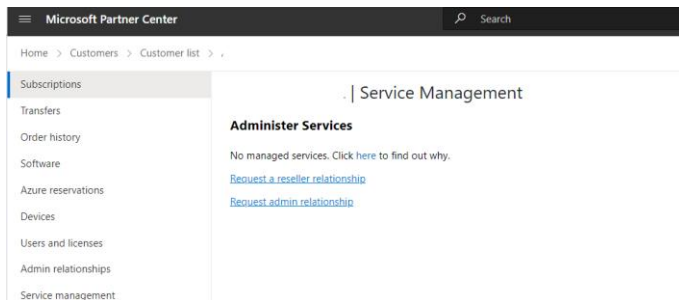

- Select Customers then search for the customer in the customer list.
Note: You may search by name, primary domain name or tenant ID.
- Click on the customer name

- Select Service Management from the menu then select Microsoft Azure Management Portal

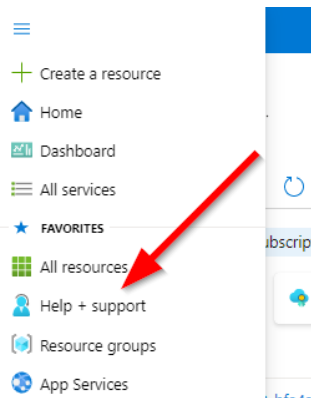

- **Note:** If your screen looks like the following, you will need to use another method. You may confirm GDAP permissions from the “Admin Relationships” option in the menu.

- In the Azure Portal, select Help+Support from the menu to open a support ticket.

Opening Azure Support Tickets

Type:	4. Instruction	Version:	2.0
Status:	Final	Effective:	7/18/2023

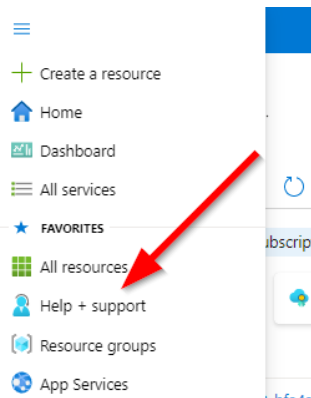

4.2. Direct URL

- Obtain the end user's domain name or tenant id. This may be provided by the customer or obtained from the Account screen in Partner Center.
- Go to [https://portal.azure.com/\[customerdomainname\]](https://portal.azure.com/[customerdomainname]) or [https://portal.azure.com/\[tenantid\]](https://portal.azure.com/[tenantid]).

Note: Replace [customerdomainname] with the customer's domain name or replace [tenantid] with the customer's tenant id.

- Log in using your Partner Center credentials.
- In the Azure Portal, select Help+Support from the menu to open a support ticket.

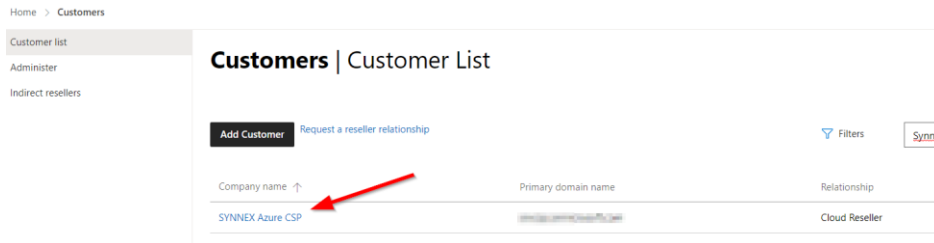

4.3. Partner Center Subscription Screen

- Log into [Partner Center](#) using a credential with AdminAgent permissions.
- Select Customers then search for the customer in the customer list.
Note: You may search by name, primary domain name or tenant ID.
- Click on the customer name

Opening Azure Support Tickets

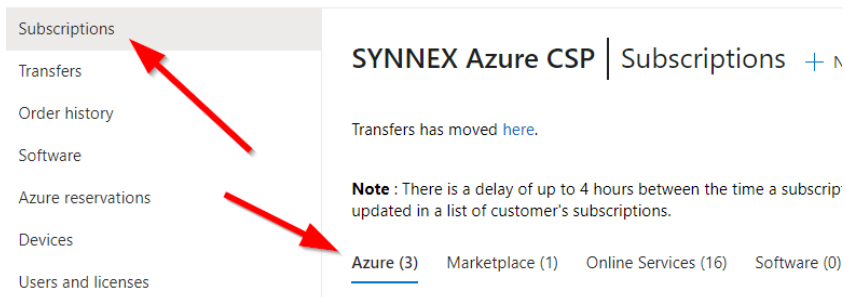

Type:	4. Instruction	Version:	2.0
Status:	Final	Effective:	7/18/2023

- Click on Subscriptions then click on Azure

Home > Customers > Customer list > [SYNNEX Azure CSP](#)

- After clicking on Azure, a list of Azure Plans will be displayed. Click on View Subscriptions

SYNNEX Azure CSP | Subscriptions + New Subscription ↓ Export All Subscriptions

Transfers has moved [here](#).

Note : There is a delay of up to 4 hours between the time a subscription is activated and when its activation status is updated in a list of customer's subscriptions.
