1. Purpose

You cannot change the Azure Active Directory tenant of an Azure CSP subscription. This procedure defines the process required to move a CSP subscription from one Azure AD tenant to another.

IMPORTANT: This procedure assumes you are familiar with Azure Portal, Azure Active Directory, Azure resources, and performing subscription moves.

IMPORTANT: There are significant risks when moving subscriptions between tenants. Careful planning is mandatory before proceeding. If you do not fully understand the risks and process, engage Professional Services resources. This document may be incomplete, use it at your own risk; TD Synnex is not responsible for any losses incurred.

3. Process

The high-level process is

1. Create a Pay-As-You-Go (PayGo) subscription in source tenant
2. Move the resources from the CSP subscription in the source tenant to the PayGo
3. Change the directory of the PayGo to the destination tenant
4. Move the resources from the PayGo to a CSP subscription in the destination tenant
5. Delete the PayGo subscription
6. Delete the CSP subscription in the source tenant

4. Procedure

4.1. Before Moving

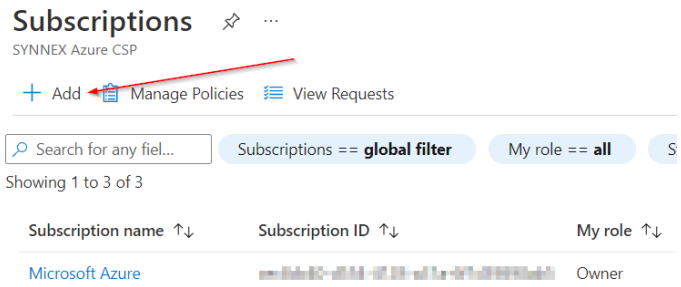

4.1.1. Consider the following before deciding if a tenant transfer should be done

Note: Anything that relies on AD will stop working since the object IDs referenced will no longer be available after the tenant change.

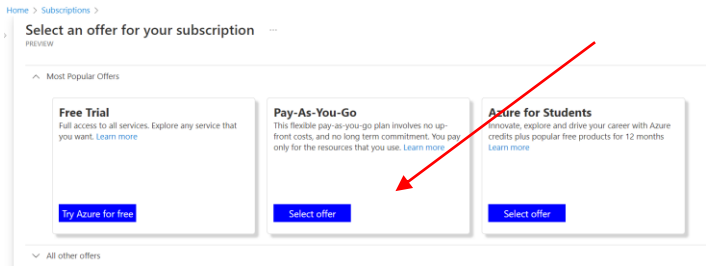

- All role assignments are permanently deleted
- Custom roles are permanently deleted
- System and user-assigned managed identities will not work
- Key Vault access may be lost and unrecoverable. Read documentation for instructions on how to move Key Vaults successfully.
- Azure SQL with Azure AD authentication cannot transfer
- Storage using ACL will require the ACLs to be recreated
- Managed disks may need changes to encryption to be accessible
- Azure Kubernetes Services cannot transfer
- Azure Active Directory Domain services cannot transfer
- Azure Policies will need to be recreated
- App Registrations will need to be recreated

4.1.2. Create Pay-As-You-Go Subscription

1. Log into the Azure Portal
2. Navigate to the `Subscriptions` blade
3. Click the + `Add` button above the subscription list

4. Select the Pay-As-You-Go offer

Note: If you have not used a Free Trial subscription in this tenant, you might be able to use it instead of a Pay-As-You-Go subscription. Since it has cost limitations if the environment is too large you may end up with resources shutting down. A Pay-As-You-Go subscription is recommended.

5. Follow the steps on the screen to setup the new Pay-As-You-Go subscription. You will be required to enter a credit card number for billing.

6. The new Pay-As-You-Go subscription will appear in the subscription list. You may have to go to the global subscription filter to set visibility.

4.1.3. Create a New CSP Subscription in the Destination Tenant

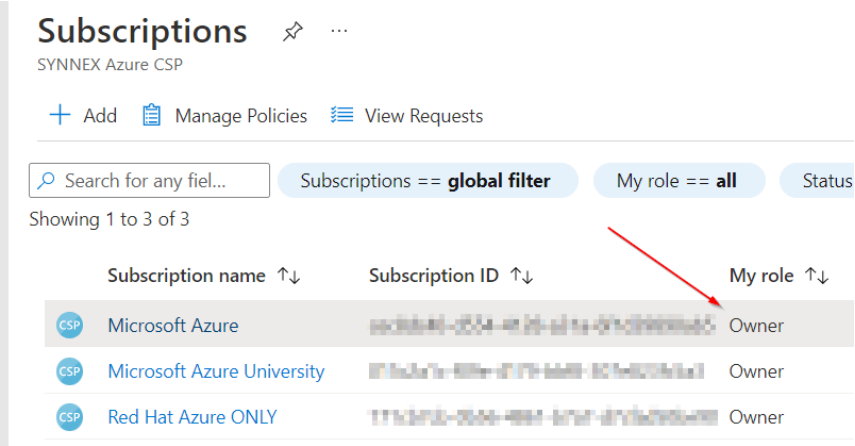

1. Log into the Stellr portal and create a new Azure Plan subscription in the destination tenant. Contact your TD Synnex Account Manager if you require assistance.
2. The user who will be performing the moves will need the `Owner` role on the new subscription.

4.2. Moving

4.2.1. Verify Access

You must have the owner role in both CSP subscriptions and the new Pay-As-You-Go subscription AND be a global administrator in both the source and destination tenants to perform a resource move. The same user Id must have access in both tenants.

1. Log into the Azure Portal for the source subscription.
2. Navigate to the `Subscriptions` blade
3. Confirm that you have the `Owner` role for each Subscription under the `My Role` column.

4. If you do not have `Owner` for a Subscription, add it before continuing.
5. Log into the Azure Portal for the destination subscription. Use the same login you used for the source subscription.
6. Confirm that you have the `Owner` role for the new CSP subscription the in the destination tenant.

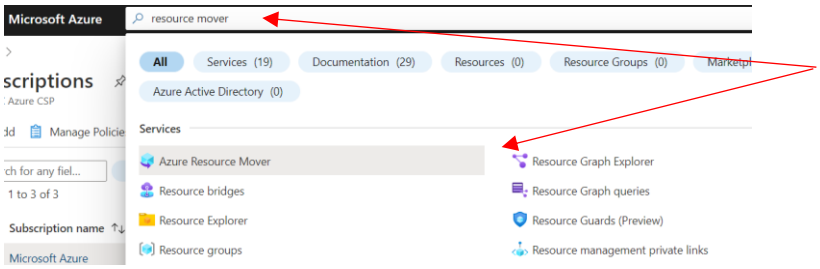

4.2.2. Move the Resource Groups from the CSP Subscription to the Pay-As-You-Go Subscription

Instruction on how to use the Azure Resource Mover tool is beyond the scope of this document. Contact your TD Synnex Account Manager if you need assistance from our Professional Services organization.

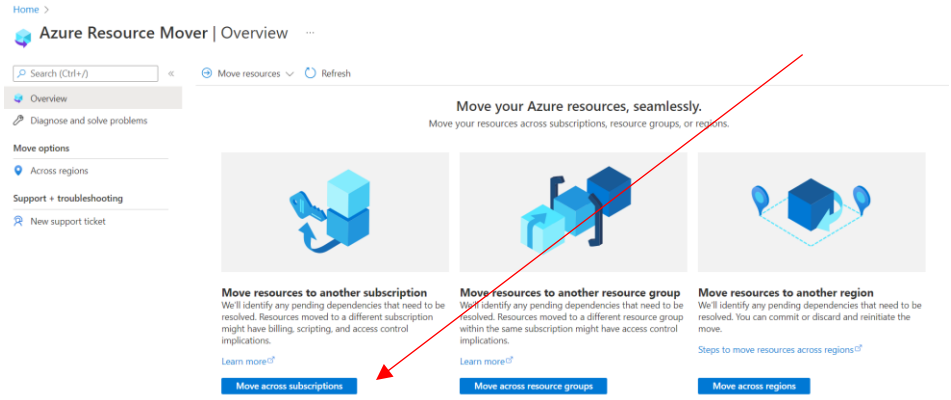

Copyright © 2020. TD SYNNEX Corporation. All Rights Reserved.

Note: There are specific rules about which resources can be moved and how to move some resources. Links to instructions may be found at the end of this document.

1. Log into the Azure Portal
2. In the search bar, enter `Resource Mover` the click on `Azure Resource Mover`

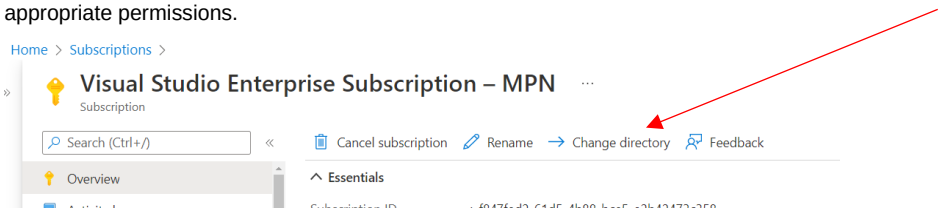

3. Follow the process under “Move resources to another subscription” to transfer the resources from the CSP subscription to the Pay-As-You-Go subscription.

4.2.3. Perform the Tenant Transfer

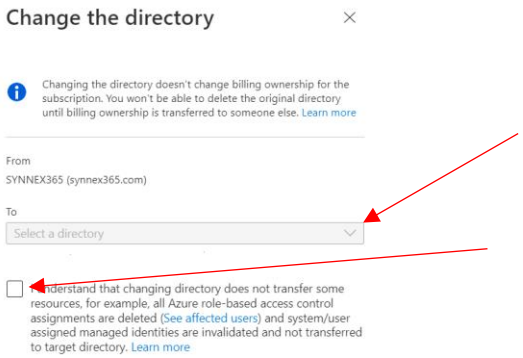

1. Log into the Azure Portal in the source tenant
2. Navigate to the `Subscriptions` blade
3. Select the Pay-As-You-Go subscription.
4. Under `Overview` click on `Change Directory`

   Note: If you do not see Change Directory you may be in a CSP subscription or not have the appropriate permissions.

5. In the new window, choose the destination tenant from the drop-down list, check the check box the click `Change`

Copyright © 2020. TD SYNNEX Corporation. All Rights Reserved.

Note: If you get a message stating “Cannot change directory because you only have access to one directory.” then you do not have the correct permissions in the destination tenant.

4.2.4. Move the Resource Groups from the Pay-As-You-Go Subscription to the CSP Subscription in the Destination Tenant

1. Follow the same steps from Section 4.2.2 above, except this time you will be moving from the Pay-As-You-Go subscription.

4.3. Post Move

4.3.1. Delete the Pay-As-You-Go subscription

1. Log into the Azure Portal in the destination tenant
2. Navigate to the `Subscriptions` blade
3. Select the Pay-As-You-Go subscription.
4. Click on `Resources` under the `Settings` menu. Confirm that there are no resources in the subscription. If there are resources, move them to the new CSP subscription or delete them.
5. Change to the `Overview` menu
6. Click on Cancel subscription

7. Follow the prompts to complete the cancellation.

4.3.2. Delete the Old CSP subscription

1. Log into the Azure Portal in the source tenant
2. Navigate to the `Subscriptions` blade
3. Select the CSP subscription.

Copyright © 2020. TD SYNNEX Corporation. All Rights Reserved.

4. Click on Resources under the Settings menu. Confirm that there are no resources in the subscription. If there are resources, determine if they are required, why they were not moved and develop a plan to address them – do not continue until you know how you want to address them.
5. Log into the Stellr portal and use the Cancel subscription function to cancel the subscription. Contact your TD Synnex AM if you need assistance.

4.3.3. Clean Up Resources

1. Restore connectivity to applications and resources
2. Delete the source tenant if it is no longer needed. A link to Azure documentation may be found at the end of this document.

5. Definitions

Term	*Definition*
Tenant	A dedicated and trusted instance of Azure AD that's automatically created when your organization signs up for a Microsoft cloud service subscription. An Azure tenant represents a single organization.
Directory	Directory is another name for Tenant. Azure uses them interchangeably.
Subscription	A single billing unit for Azure resources in that services used in Azure are billed. A tenant may have multiple subscriptions, but a subscription may only belong to one tenant.
Global Administrator	The most privileged role to which a user may be assigned in an Azure Active Directory.
Owner	The most privileged RBAC role on a subscription that give the user full access to the subscription.
