3. Instructions

3.1.0 Azure Portal

3.1.1. Partner Center - View All Resources in Azure Portal

1. Log into [Partner Center](#)
2. Click on [Customers](#) the search for the customer you want to access.
3. Navigate to the Subscriptions blade.
4. To the right of Usage-base is the link View all resources in Azure portal.
5. Click this link and you will be redirected to the All Resources blade in the Azure Portal.

Usage-based Report for 8/30/21 8:45 AM [View all resources on Azure portal](#) 

Billing period August 1, 2021 - August 31, 2021

Days remaining 1

Monthly budget Apply Cancel

Current estimated cost \$0.02

% of budget 0%

Name ↓	Current estimated cost	% of budget	Status	Reseller
Azure plan	\$0.02	0%	Active	▼

3.1.2. Partner Center – Azure Plan Manage

Note: This option only applies if the customer has Azure Plan subscriptions, it does not work for Legacy subscriptions.

1. Log into [Partner Center](#)
2. Click on [Customers](#) the search for the customer you want to access.
3. Navigate to the Subscriptions blade.
4. Expand the Azure Plan by clicking the down arrow to the right of the Azure Plan.

Name ↓	Current estimated cost	% of budget	Status	Reseller
Azure plan	\$0.02	0%	Active	▼ 

5. Click the work Manage by the subscription.

- [Visual Studio Marketplace](#)

- You will be redirected to the home blade in Azure Portal.

3.1.4. Azure Portal – Using a Tenant account

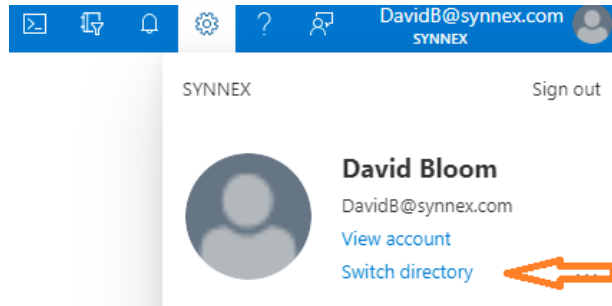

- Navigate to the [Azure Portal](#).
- When asked to login, use a user account that exists in the customer tenant.
- You will be redirected to the home blade of the customer tenant.

Note: This the common way that an end user will log into their tenant.

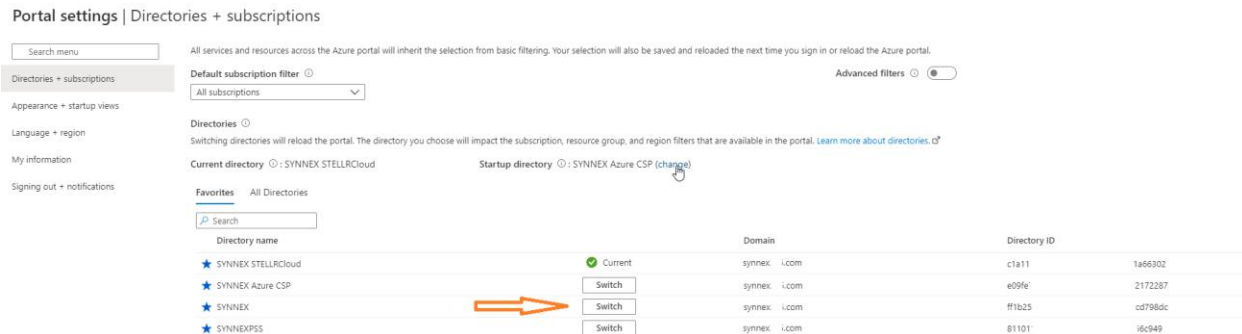

3.1.5. Azure Portal - Switch Directory

If you have access to multiple tenants using one login, you can log into the portal then use the switch directory blade to change tenants.

1. Navigate to the [Azure Portal](#).
2. When asked to login, use your account that has access to multiple tenants.
3. Click on your name in the upper right corner of the screen.
4. Click on Switch directory.

5. You will be redirected to the Portal settings blade where you can switch directories.

6. Click on Switch by the subscription you want to access.

3.1.6. Azure Portal – Using Domain Name

You can connect to a customer tenant by adding a domain name to URL.

1. Navigate to <https://portal.azure.com/<domainName>>
Replace **<domainName>** with the domain name of the customer tenant.

Note: A tenant may have multiple domain names. You may use any of the domain names, not just the primary.

Note: To find the domain name, go to Azure Active Directory -> Custom domain names

3.1.7. Azure Portal – Using Tenant Id

You can connect to a customer tenant by adding a tenant id to URL.

1. Navigate to <https://portal.azure.com/<tenantId>>
Replace **<tenantId>** with the tenant of the customer tenant.

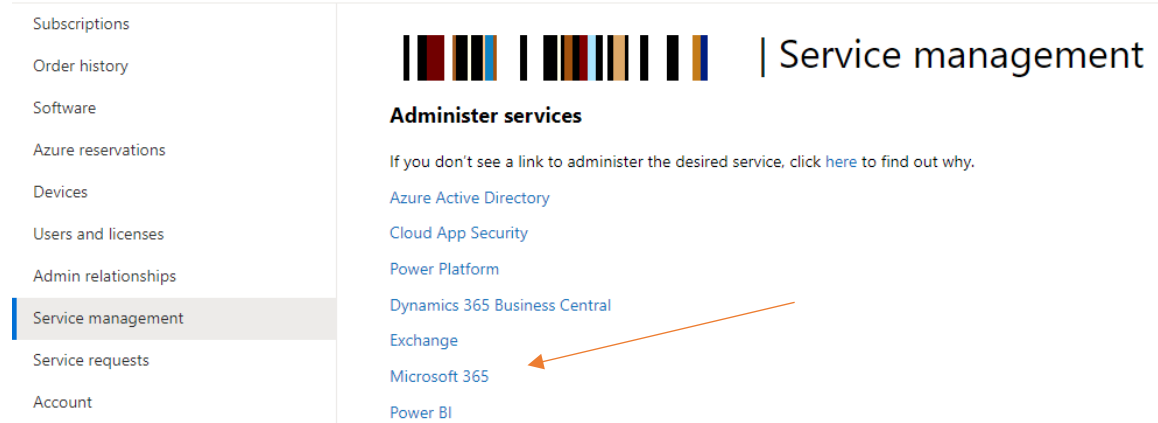

Note: You can find the tenant Id on the customer's Account blade in Partner Center.

3.2. Microsoft 365 Admin Center

3.2.1. Partner Center

1. Find the customer in Partner Center then click on **Service management** on the menu
2. Click on **Microsoft 365** under **Administer services**

Home > Customers > Customer list > 

3. You will be taken to the Microsoft 365 admin center

3.2.2. Using URL

You will need the customer's tenant id for this method. You can get it from the Account blade in Partner Center or from the Azure AD blade in the Azure portal.

1. Navigate to:

https://portal.office.com/Partner/BeginClientSession.aspx?CTID=<tenant_ID>&CSDEST=o365admincenter

Replace **<tenant_ID>** with the tenant ID of the customer tenant.

Note: You will need to login with an AdminAgent credential or other credential that has access to the tenant.

3.3. Identifying End User Partner Relationships

3.3.1. Microsoft 365 Admin Center

1. Access the end user's Microsoft 365 admin center using one of the methods above
2. Expand the menu by clicking Show all
3. Expand Settings by clicking the down arrow to the right
4. Click on Partner Relationships

Accessing Customer Tenants
