

1. Purpose

GDAP relationships have a maximum duration of 730 days (2 years); however, in most cases they may be set to auto extend.

TD SYNEX has been asked frequently about the expiration of GDAP and the procedure for automatic extension.

⚠ Your Granular admin relationship with customer.com expires soon

Starting on August 20, 2024, your MLT_7987659_12345_4d23122a Granular admin relationship with customer.com will end. Reseller will no longer have access to manage your account with Microsoft. This relationship and assigned roles gives them access to the Microsoft 365 admin center and other sites to manage your account.

Details

Expires on August 20, 2024

Relationship name MLT_7987659_12345_4d23122a

Partner roles [View assigned roles in Microsoft 365 admin center](#)

Partner name Reseller

Partner contact [Partner contact information](#)

If you want to continue working with customer.com, ask them to auto extend the Granular admin relationship before expiry.

GDAP Expiration

Type:	7. Reference	Version:	1.0
Status:	Final	Effective:	8/23/2024

These emails show that the reseller's GDAP relationship with the end user is about to expire. They don't concern TD SYNnex's GDAP relationship. The reseller should enable Auto Extend, if possible, or request a new GDAP relationship with the customer.

For more information, refer to the "Tech Note - GDAP for Resellers - Rev X.X" available from your TD SYNnex account manager.

N.B. The reseller may not have set up the GDAP relationship initially. Microsoft may have established it when they converted DAP to GDAP.

3.2. End User Expiration Notices

The end may receive emails similar to the following.

⚠ Your Granular admin relationship with SYNnex365 expires soon

Starting on August 15, 2024, your GDAP-ec80512965b4-095004 Granular admin relationship with SYNnex365 will end. SYNnex365 will no longer have access to manage your account with Microsoft. This relationship and assigned roles gives them access to the Microsoft 365 admin center and other sites to manage your account.

Partner contact	Partner contact information

If you want to continue working with SYNnex365, ask them to auto extend the Granular admin relationship before expiry.

Your Granular admin relationship with TD Synnex expired

Your MLT_12345678_12345678_aaaabbbb Granular admin relationship with TD SYNnex expired on July 11, 2024. TD Synnex no longer has access to manage your account with Microsoft. This relationship and assigned roles previously gave them access to the Microsoft 365 admin center and other sites to manage your account.

Details

Expired on	July 11, 2024

Partner roles	View assigned roles in Microsoft 365 admin center
Partner contact	Partner contact information

If you want to authorize this partner again so they can manage your account with Microsoft, ask them to send you a new Granular admin relationship request.

The end user will receive notifications about TD SYNnex and reseller GDAP expiration.

If the customer contacts the reseller, they should verify the partner mentioned in the notice.

If the reseller is named, they should check and auto extend their GDAP relationship, if possible, or request a new one.

If TD SYNnex is named, inform the customer that TD SYNnex will auto extend all non-expired relationships, and for expired ones, they will collaborate with the reseller to request a new relationship.

3.3. GDAP Expiration Report

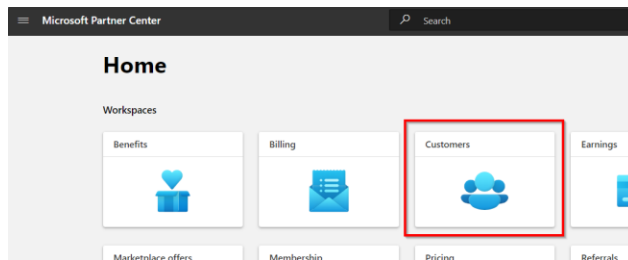

Any member of the reseller team who is an Admin Agent may see a [GDAP expiration report](#) in Partner Center.

- Log into [Partner Center](#)
- Click on the [Customers](#) tile

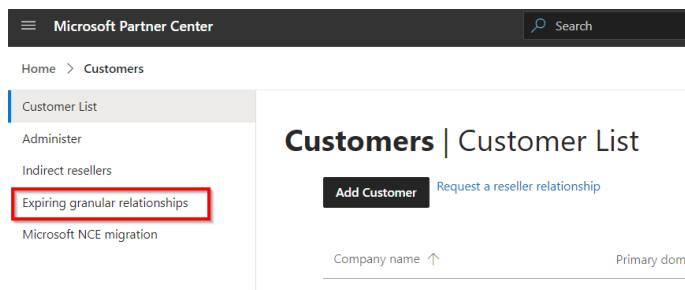

GDAP Expiration

Type:	7. Reference	Version:	1.0
Status:	Final	Effective:	8/23/2024

- Click on [Expiring granular relationships](#)

- A list of expiring relationships and other statistics will be provided.

Expiring within 30 days		Expiring within 7 days		Expiring within 1 day		Expiring after 30 days		Expired		Auto Extend Disabled		Auto Extend Enabled	
Total GDAPs	Percent	Total GDAPs	Percent	Total GDAPs	Percent	Total GDAPs	Percent	Total GDAPs	Percent	Total GDAPs	Percent	Total GDAPs	Percent
18	27%	4	6%	3	5%	49	74%	54	45%	54	81%	13	20%

Customer Name	Admin Relationship Name	Duration in days	Expiring in	Auto Extend Duration
Microsoft Corporation	Default, 2012	180	76	No
Tell-It Customer 4 using GDAP	MCT	985	927	No
Tell-It Company 2	Without customer relationship 1	750	181	No
Tell-It Company 1	MCT	365	223	No
Tell-It Company	Tell-It Admin	365	19	Yes (6 months)

3.4. Remove Global Admin Role

Auto-extending GDAP relationships is possible only if the Global Administrator role is not included. To enable auto-extend for roles that haven't expired, the reseller must first remove the Global Administrator role, if it is included.

- Navigate to the Expiring granular relationships report per the section above.
- Select one or more GDAP roles that contain Global Administrator

Customer Name	Admin Relationship Name	Duration in days	Expiring in	Auto Extend Duration	Status
☒ TD SYNEX Azure CSP Demo Site	GDAP-e09fe7ba-2840-4126-b83e-6f8622172287-103023	730	428	NA	active

- Click Remove Global Administrator role.
- The Global Administrator role is removed, but all other roles are left intact.
- You may not enable auto extend for the relationship.

GDAP Expiration

Type:	7. Reference	Version:	1.0
Status:	Final	Effective:	8/23/2024

N.B. If the relationship solely comprises the global administrator role, it will cease to function. You must establish a new relationship including non-global administrator roles and proceed with auto-extension.

3.5. Enabling Auto Extend

With auto extend enabled for a GDAP role, the expiration date will push forward by 180 days upon reaching the current expiration date. This extension will persist until auto extend is turned off or the customer ends the relationship.

- Navigate to the Expiring granular relationships report per the section above.
- Select one or more active GDAP roles that do not contain Global Administrator and do not have auto extend enabled. Enable auto-extend will not be enabled if global administrator is present in the list of roles.

3.6. Request a New GDAP Relationship for TD SYNEX

The process to request a new GDAP relationship for TD SYNEX depends on the eCommerce platform the reseller uses. Please reach out to your TD SYNEX account manager for specific instructions and assistance.

3.7. Tenant Lockout

If the reseller and TD SYNEX GDAP relationships expire, the end user's global administrator must accept a new relationship. Without access to a global administrator or the password, the end user might be locked out of their tenant.

If a customer is fully locked out, only the end user's global administrator can regain access by contacting the Microsoft Data Protection Team directly. According to Microsoft's rules, neither the reseller nor TD SYNEX can help in this situation.

For more information about tenant lockouts, see the TD SYNEX tech note called "Tech Note – Tenant Lockout - Rev X.X" which is available from your TD SYNEX account manager.

4. Definitions

<i>Term</i>	<i>Definition</i>
Admin Agents	A security group within the CSP partner's Microsoft Entra tenant. Members of this group are granted significant administrative privileges, allowing them to manage customer tenants and subscriptions.
Auto Extend	A GDAP relationship with auto extend doesn't expire on the last day of the GDAP, it's rolled forward by six months, so that Partner doesn't need to request a new GDAP relationship. The relationship will continue to roll forward until Auto Extend is disabled or the customer terminates the GDAP relationship.
DAP	Delegated admin permissions (DAP) provided partners with global administrator permissions to customer environments. DAP has been deprecated and all DAP relationships were converted to GDAP.
GDAP	Granular delegated admin permissions (GDAP) give partners access to their customers' workloads in a granular and time-bound manner.
Global Administrator	In Microsoft Entra ID, the Global Administrator (GA) role has the highest level of permissions. Users assigned this role can manage all aspects of Entra ID and Microsoft services that use Entra ID identities.
MLT	Microsoft Led Transition (MLT) was the process where Microsoft automatically transitioned DAP relationships to GDAP. The relationship names start with MLT and were given a predefined set of permissions.
Partner Center	A centralized platform where partners in the Cloud Solution Provider (CSP) program can manage their relationship with Microsoft and their customers. Also called PAC or MPC.
Tenant Lockout	A tenant lockout situation in Azure occurs when all administrative access to an Entra ID tenant is lost

1.0	8/23/2024	Initial Draft	David Bloom

8. Appendix A – MLT

When Microsoft transitioned DAP to GDAP, a predefined set of permissions were established and assigned to the Admin Agents and Helpdesk Agents security groups.

See: [Microsoft-led transition from DAP to GDAP - Partner Center | Microsoft Learn](#)

Role	Definition	Assignment
Directory readers	Can read basic directory information. Commonly used to grant directory read access to applications and guests.	Admin Agents
Directory writers	Can read and write basic directory information. Commonly used to grant access to applications. This role isn't intended for users.	Admin Agents
Global Reader	Can read everything that a Global Administrator can, but not update anything.	Admin Agents
License administrator	Can manage product licenses on users and groups.	Admin Agents
Service support administrator	Can read service health information and manage support tickets.	Admin Agents, Helpdesk Agents
User administrator	Can manage all aspects of users and groups, including resetting passwords for limited admins.	Admin Agents
Privileged role administrator	Can manage role assignments in Microsoft Entra ID and all aspects of Privileged Identity Management (PIM).	Admin Agents
Helpdesk administrator	Can reset passwords for non-administrators and helpdesk administrators.	Admin Agents, Helpdesk Agents
Privileged authentication administrator	Can access, view, set, and reset authentication method information for any user (admin or non-admin).	Admin Agents
