

1. Purpose

Microsoft is ending the use of Delegated Administration Permissions (DAP) and is replacing it with Granular Delegated Admin Permissions (GDAP). TD Synnex will be updating the permissions used by TD Synnex; however, the resellers will need to establish GDAP for the reseller's use if desired.

IMPORTANT: TD Synnex's GDAP permissions do not flow to the reseller.

Starting September 25, 2023, Microsoft will no longer grant DAP for new customer creation and will instead grant default GDAP with [specific roles](#).

This document provides a potential implementation for resellers. TD Synnex recommends that the reseller review the documentation provided by Microsoft and modify the recommendations in this document to satisfy the reseller's unique business needs.

10.	Appendix D – Bulk Migrate from DAP to GDAP	14

3. Recommendation

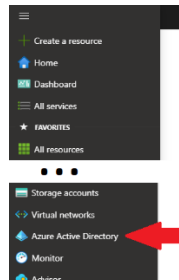

3.1. Create Security Groups in Reseller Azure AD

Note: See Appendix A for the security groups created by TD Synnex for our internal use.

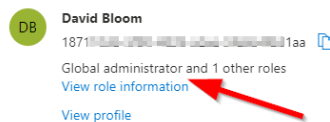

IMPORTANT: You will be creating these security groups in the tenant you use to manage your end user customers. You will not be creating them in the end user tenants.

IMPORTANT: The user completing this step should be a global administrator in the tenant.

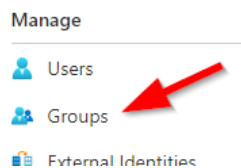

- Log into the [Azure portal](#) for your tenant using a global administrator login.
- Expand the left menu and click on Azure Active Directory

- Confirm that you are a global administrator

- Select Groups from the menu

- The Groups blade will appear. Click "New Group" to add a security group.

- The Group Type is "Security". Azure AD roles are not required and Membership Type should be "Assigned"
- Give the group a name and Description. TD Synnex chose to start the group names with "GDAP-".

Group type * 
 Security 

Group name * 
 GDAP-Managed Services 

Group description 
 All managed services personnel 

Azure AD roles can be assigned to the group 
 Yes  No 

Membership type * 
 Assigned 

- Specify an owner of the group and add the personnel who will be members of this group.

Owners
 1 owner selected

Members
 4 members selected

- At the bottom of the screen, click “Create”

- You may add and remove users as required.

3.2. Request Admin Relationships in Partner Center

- Log into [Partner Center](#)
- Navigate to Customers -> Administer

Note: You may also create the request from the Customer -> Admin relationships page.

Home > Customers

Customer list

Administer

Customers | Granular administration

To request an admin relationship with the customer, select the link below. To manage an existing admin relationship, select the customer company from the list below.

Finalize request

Cancel

- Enter a name for this Admin relationship

Note:

- This name must be unique across all of your customers in Partner Center. The name may be 1 to 50 characters long.
- TD Synnex chose to:
 - Start all of our relationships with “GDAP – “
 - Use the end user tenant ID (Microsoft ID) next
 - Then the current date serial
 - An additional serial digit (1,2,3, etc) if more than one is created in a day
- Since the name never goes away, even after expiration, and there can be multiple relationships per end user, this allows for virtually an unlimited number of relationships.
- Example for a customer with the Tenant ID "12345678-BBBb-cCCCC-0000-123456789012" created on September 1, 2022

GDAP-12345678-BBBb-cCCCC-0000-123456789012-44523

Note: This will be 48 characters long, allowing for 2 digits to be used for additional serialization.

- Select the number of days until this relationship expires. It may be between 1 and 720 days (2 years).
 - Why choose less than 2 years? You may have a need for global admin permissions for a customer who does not want to provide them. You could create

Type:	7. Reference	Version:	1.8
Status:	Final	Effective:	1/29/2026

a relationship for 1 day with global admin to allow you to complete a project and still satisfy the customer.

- Microsoft has stated that they may create an auto-extend feature. More information will be available in Oct 2023.
- Select the Azure AD roles that will be available to this relationship. All roles do not need to be assigned to each security group; however, these are the only roles that will be available for assignment.
- Click “Finalize request”
- A new screen will appear. This screen contains the text of the request that may be emailed to the customer. The link in the email is the important part and may be messaged to the customer outside of an email.

Can read everything that a global administrator can, but not update anything.

Done

- After providing the request to the customer, click Done.

IMPORTANT: The link is single use and may only be used by one customer per link.

3.3. End User Accepts Relationship Request

Note: The person who accepts the GDAP invitation must be a global administrator in the tenant. They cannot be a guest user or a user using DAP/GDAP/AOBO.

- The end user will click on the link in the invitation.

Note: It is recommended that the end user copy the link to an InPrivate window in their web browser. This will help reduce issues if they have multiple logins.
- The end user will need to login with a global administrator login.
- The end user will be taken to their Microsoft 365 admin center.

Roles

[Global Administrator](#)

Duration

730 days

By selecting SYNnex Corporation, you're electing to grant this Partner administrator permissions, which includes acting as your agent to communicate with Microsoft. These permissions will allow the Partner to be the primary administrator of the Online Services and have administrative privileges and access to Customer Data and Administrator Data. Customer consents to Microsoft and its Affiliates providing the Partner with Customer Data and Administrator Data for purposes of provisioning, administering and supporting (as applicable) the Online Services. Partner may process such data according to the terms of Partner's agreement with Customer, and its privacy commitments may differ from Microsoft's. Customer may terminate the Partner's administrative privileges at any time. You acknowledge and agree that you (a) have the authority to grant the Partner these permissions on behalf of Customer, (b) understand the impact of accepting this Partner, (c) have reviewed the permissions for each role, and (d) accept responsibility for the Partner's actions according to these permissions.

Approve all

Cancel

- They will need to check the box and then click Approve all

Note: The information on this screen will be for your company, not Synnex.

- Under the customer -> Admin relationships in your Partner Center, you will see a new relationship and it will show Active.

7. Appendix A – Security Groups Used by TD SYNnex

TD Synnex chose to create multiple Azure AD Security Groups for use with GDAP. This was done to allow for more flexible application of permissions. We prefixed the GDAP related groups with GDAP to allow them to be readily distinguished from our other security groups.

The reseller should create groups that are needed by their business. This list should not be viewed as a recommended implementation.

- GDAP - Azure Access
- GDAP - Managed Services
- GDAP - Operations Support
- GDAP - Platform Development
- GDAP - Professional Services
- GDAP - Sales Support Group
- GDAP - Service Accounts
- GDAP - Solutions Instance
- GDAP - Solutions Perpetual
- GDAP - Technical Support
- GDAP - Technical Support Supervisors

8. Appendix B – Roles Requested by TD SYNnex

TD SYNnex requests a set of roles through our eCommerce platforms. Currently the roles requested are:

GDAP Limited Access	GDAP Recommended Access
Service Support Administrator Global Reader Cloud Application Administrator	Service Support Administrator Global Reader Cloud Application Administrator Help Desk Administrator Privileged Authentication Administrator Billing Administrator License Administrator User Administrator Intune Administrator Security Administrator Password Administrator Directory Reader

See: <https://learn.microsoft.com/en-us/azure/active-directory/roles/permissions-reference>

9. Appendix C – Group Assignments at TD SYNEX

TD SYNEX has chosen to assign the roles we request to our groups as follows. This is how TD SYNEX chose to assign them; however, as a distributor our needs may be different from resellers.

GDAP Recommended Access	
GDAP Group	Roles
GDAP - Azure Access	Service Support Administrator, Global Reader, Directory Reader
GDAP - Managed Services	Global Reader, Help Desk Administrator, Privileged Authentication Administrator, Billing Administrator, License Administrator, User Administrator, Intune Administrator, Security Administrator, Service Support Administrator, Password Administrator, Directory Reader
GDAP - Operations Support	Global Reader, Billing Administrator, License Administrator, Service Support Administrator, Directory Reader
GDAP - Platform Development	Global Reader, Billing Administrator, License Administrator, User Administrator, Service Support Administrator, Password Administrator, Directory Reader
GDAP - Professional Services	Global Reader, Help Desk Administrator, Privileged Authentication Administrator, Billing Administrator, License Administrator, User Administrator, Intune Administrator, Security Administrator, Service Support Administrator, Password Administrator, Directory Reader
GDAP - Sales Support Group	Global Reader, Billing Administrator, License Administrator, Directory Reader
GDAP - Service Accounts	Global Reader, Cloud Application Administrator, Help Desk Administrator, Privileged Authentication Administrator, Billing Administrator, License Administrator, User Administrator, Intune Administrator, Security Administrator, Service Support Administrator, Password Administrator, Directory Reader
GDAP - Solutions Instance	Global Reader, Help Desk Administrator, Privileged Authentication Administrator, Billing Administrator, License Administrator, User Administrator, Intune Administrator, Security Administrator, Service Support Administrator, Password Administrator, Directory Reader
GDAP - Solutions Perpetual	Global Reader, Help Desk Administrator, Privileged Authentication Administrator, Billing Administrator, License Administrator, User Administrator, Intune Administrator, Security Administrator, Service Support Administrator, Password Administrator, Directory Reader
GDAP - Technical Support	Global Reader, Billing Administrator, License Administrator, Service Support Administrator, Password Administrator, Directory Reader
GDAP - Technical Support Supervisors	Global Reader, Help Desk Administrator, Privileged Authentication Administrator, Billing Administrator, License Administrator, User Administrator, Intune Administrator, Security Administrator, Service Support Administrator, Password Administrator, Directory Reader

10. Appendix D – Bulk Migrate from DAP to GDAP

Microsoft Documentation: [GDAP bulk migration tool - Partner Center | Microsoft Docs](#)

Microsoft has provided a tool to bulk migrate existing DAP relationships to GDAP. This tool is slated to be available until November 2023.

Use of this tool requires experience with .NET programming.

TD Synnex is not able to provide any guidance or direct assistance with using this tool; however, our ServiceSolv team has a number of independent software developers who can provide a quote to assist. Contact your TD Synnex account manager if you would like to engage the ServiceSolv team.
