

1. Purpose

Starting 15 October 2024, we will require users to use multifactor authentication (MFA) to sign into the Azure portal, Microsoft Entra admin center, and Intune admin center.

To ensure your users can maintain access, you'll need to enable MFA by 15 October 2024.

3. Reference

3.1. Affected Applications

Microsoft will be making MFA usage mandatory in phases. The current schedule is below.

Application Name	Enforcement phase
Azure portal	Tuesday, October 15, 2024
Microsoft Entra admin center	Tuesday, October 15, 2024
Microsoft Intune admin center	Tuesday, October 15, 2024
Azure command-line interface (Azure CLI)	Early 2025
Azure PowerShell	Early 2025
Azure mobile app	Early 2025
Infrastructure as Code (IaC) tools	Early 2025

Every user trying to access these applications will need to utilize multi-factor authentication (MFA).

End users accessing apps, websites, or services on Azure aren't mandated to use MFA, though it's strongly advised for everyone.

3.2. Emergency Access Accounts

Once enforcement starts, break glass or emergency access accounts will also be required to authenticate using MFA.

Microsoft advises updating these accounts to utilize passkeys (FIDO2) or setting up certificate-based authentication for MFA. Both methods comply with the MFA requirement.

3.3. Request Postponement

From 8/15/2024 to 10/15/2024, Global Administrators can use the Azure portal to delay their tenant's MFA enforcement start date to 3/15/2025. [Elevated access](#) is required for Global Administrators to postpone this date.

Global Administrators must perform this action for every tenant for which they would like to postpone the start date of enforcement.
