

1. Purpose

Azure DevOps licenses are billed to an Azure subscription. Although an Azure subscription is required, no other Azure services are required.

This procedure provides instructions on how to establish billing in DevOps.

3.4. Assign Access to Users	5
3.5. Setup Azure Pipelines	6
4. Associated Documents	8
5. Document Approval	8
6. Document Revision History	8

3. Procedure

3.1. Create an Azure Subscription

An Azure Plan and Azure subscription are required to allow for paid users in DevOps. The Azure subscription may be dedicated to DevOps or shared with other Azure services.

There is not a requirement to purchase other Azure services to use DevOps.

The DevOps “Organization Owner” or a “Project Collection Administrator” will need to be an “Owner” of the Azure subscription to set up billing.

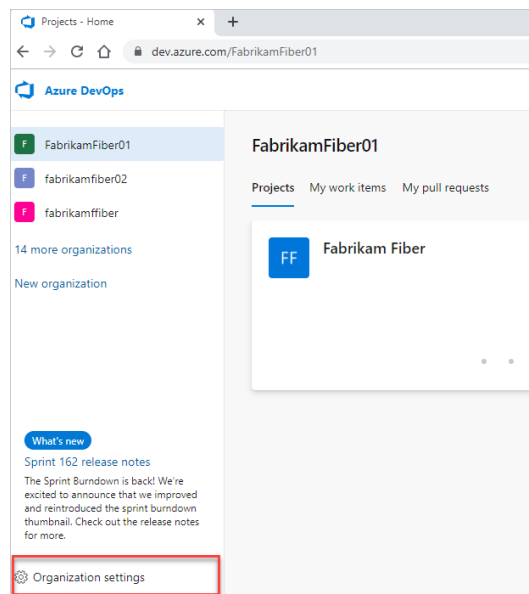

A TD Synnex Account Manager can provide instruction on how to purchase an Azure Plan and subscription in the Stellr portal.

3.2. Connect to Azure Active Directory (AD)

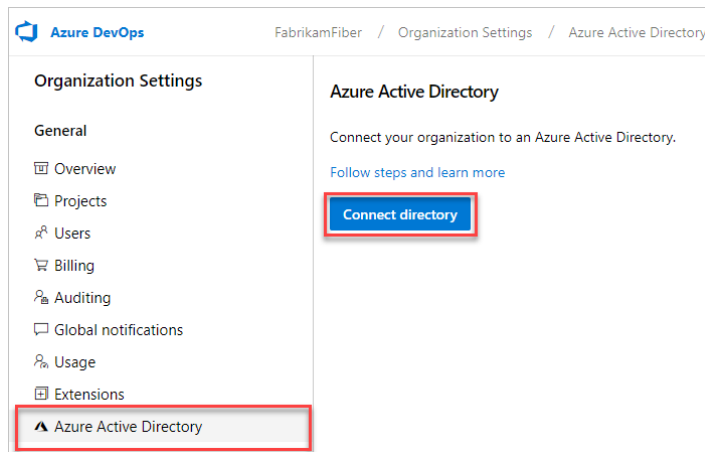

Note: Connecting DevOps to Azure AD is not required to use DevOps; however, it is highly recommended to ease management of the environment.

Note: The user will need to be a member of the Azure Active Directory to connect.

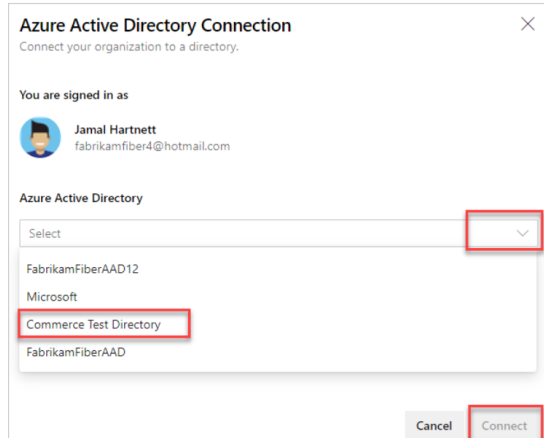

- Sign into the DevOps organization by navigating to https://dev.azure.com/<your_org>
Note: Replace <your_org> with your DevOps organization name.
- Click on **Organization settings** at the bottom left of the screen.

- Click on **Azure Active Directory** then click on **Connect Directory**

- Select a directory from the dropdown menu, and then select Connect.

Note: If you can't find your directory, contact your Azure AD administrator and request that they add you as a member to the Azure AD

- Select Sign out to completely sign out of DevOps
- Confirm that the process is complete. Sign out, and then open your browser in a private session and sign in to your organization with your Azure AD or work credentials.
- You can now assign users using their Azure AD credentials.

3.3. Setup Billing

Note: The user will need to be the Organization Owner or a Project Collection Administrator to set up billing. In DevOps, the Organization Owner is set in Overview and Project Collection Administrators are set in Security -> Permissions.

Note: The user will need to be an Owner of the Azure subscription to set up billing.

- Sign into the DevOps organization by navigating to https://dev.azure.com/<your_org>

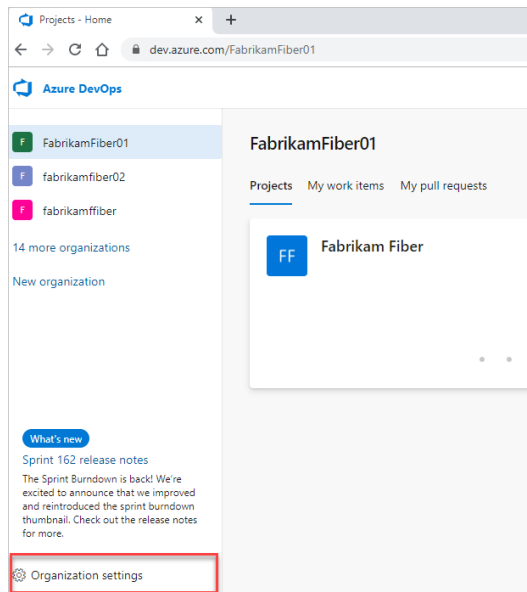

Note: Replace <your_org> with your DevOps organization name.

- Click on Organization settings at the bottom left of the screen.

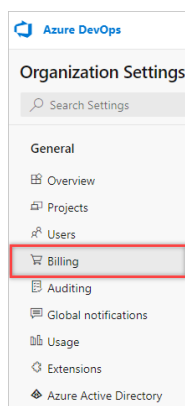

DevOps User Licenses for CSP

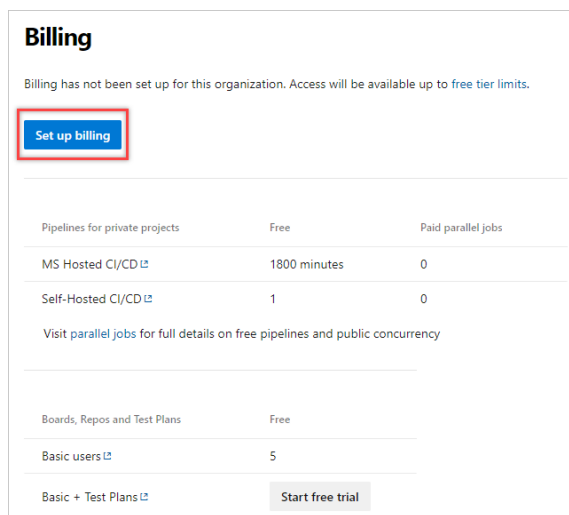

Type:	3. Procedure	Version:	2.0
Status:	Final	Effective:	8/15/2022

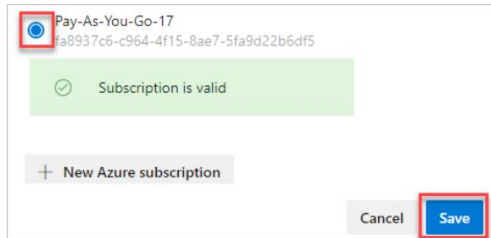

- Select Billing from the menu.

- Select Set up billing

- Select the subscription that should be billed, then click Save.

Note: The user must be an Owner of the subscription for it to appear on the list.

Note: You may bill DevOps to any subscription type except for Free Trials

Billing for DevOps users will appear on the Azure subscription invoice.

3.4. Assign Access to Users

Note: Each account receives five (5) free Basic users and no free Basic + Tech Plan users. Basic users after the first five will be charged and all Basic + Tech Plan users will be charged.

Note: Stakeholder users have no cost and Visual Studio Subscriber users have a license from Visual Studio.

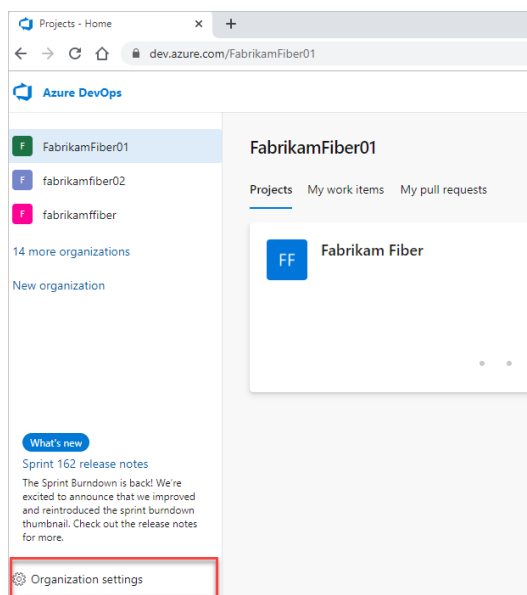

Note: You do not purchase licenses for DevOps users. When creating the user, the license is purchased for that month and deleting users will reduce the licenses starting the following month.

Note: There are many features to DevOps regarding billing. Please read the documentation provided in the Related Documents section of this document for detailed information.

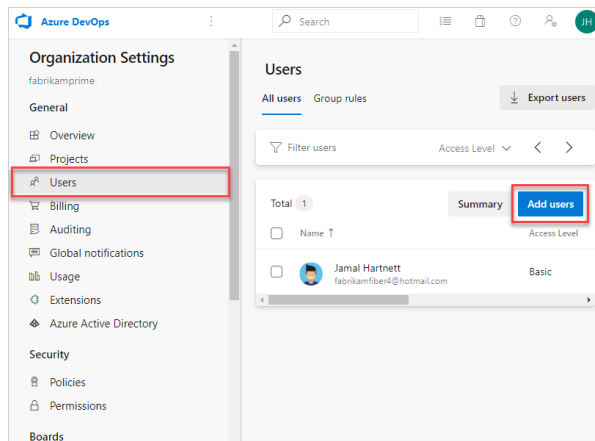

- Sign into the DevOps organization by navigating to https://dev.azure.com/<your_org>

Note: Replace **<your_org>** with your DevOps organization name.

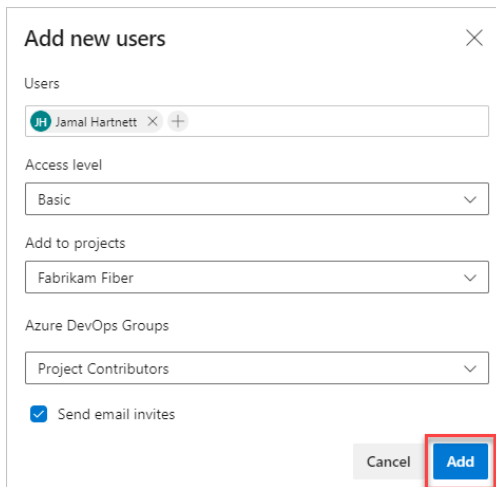

- Click on **Organization settings** at the bottom left of the screen.

- Select **Users** from the menu, and then select **Add users**.

- Enter the following information.

- Select the Access level for the user. Basic users after the first five are billed and all Basic + Test Plan users are charged.
- Ask the user to log into the organization to confirm access.
- Assign appropriate access and permissions to the user.

3.5. Setup Azure Pipelines

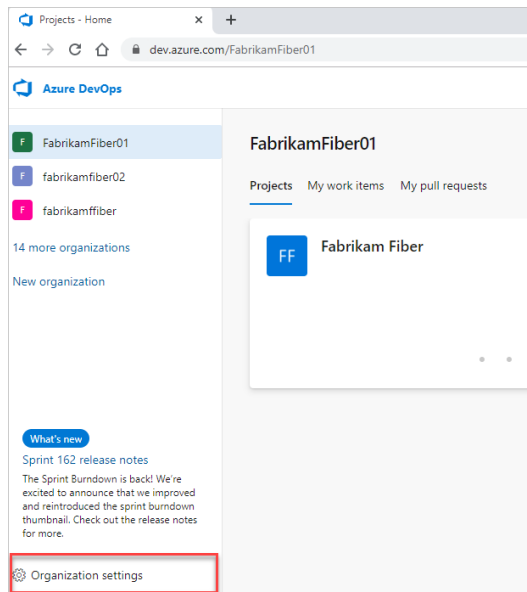

Note: The user will need to be the Organization Owner or a Project Collection Administrator to set up billing. In DevOps, the Organization Owner is set in Overview and Project Collection Administrators are set in Security -> Permissions.

- Sign into the DevOps organization by navigating to https://dev.azure.com/<your_org>
Note: Replace <your_org> with your DevOps organization name.
- Click on **Organization settings** at the bottom left of the screen.

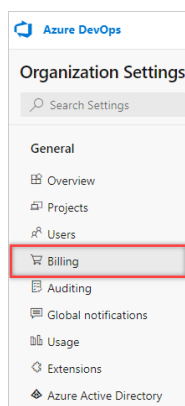

DevOps User Licenses for CSP

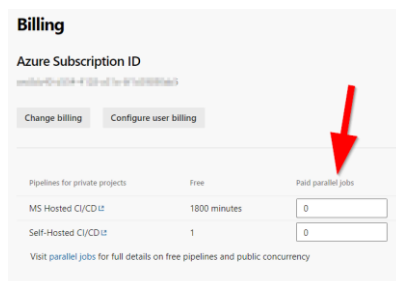

Type:	3. Procedure	Version:	2.0
Status:	Final	Effective:	8/15/2022

- Select Billing from the menu.

- Enter the number of MS Hosted and Self-Hosted CI/CD Pipelines required.

- Scroll to the bottom of the page, then click Save.

Billing for DevOps pipelines will appear on the Azure subscription invoice.
