

Finding a Provider's Microsoft ID

Type:	3. Procedure	Version:	1.1
Status:	Final	Effective:	11/5/2024

1. Purpose

To request a subscription transfer from another CSP Direct/Indirect Provider we will need the Microsoft ID of the other provider. They may not know how to find their Microsoft ID, this note describes one way to find their Microsoft ID.

NOTE: The provider's Microsoft ID is not confidential.

3.1. Definitions

Term	Definition
End User	The organization that actually uses or consumes the Azure resources to satisfy a business requirement. Usually the customer of the reseller.
Reseller	The company that purchases Azure subscriptions from TD Synnex and sells the subscription to the end user.
Provider	The company that purchases Azure subscriptions from and receives and invoice directly from Microsoft. The Provider may be either Direct (acting as a provider and reseller) or Indirect (acting as on a provider). TD Synnex is an Indirect provider.
Microsoft ID	The globally unique identifier (GUID) of a Microsoft customer. Also referred to as a Tenant ID or Directory ID. For a provider, the Microsoft ID required is the ID of the tenant used to manage the end user subscriptions. A provider may have multiple Microsoft ID's; however, only the one will work for this purpose.
GUID	A globally unique identifier (GUID) is a 16 byte, or a 128 bit integer that can be used across all computers and networks wherever a unique identifier is required. Such a number has a very low probability of being duplicated. It is formatted like "12345678-BBBb-cCCCC-0000-123456789012"
Microsoft Partner Number (MPN)	A unique identifier of a Microsoft partner in the Microsoft Partner Network (MPN). A company may have multiple MPN's but the one associated with CSP is the one required. The correct name is Microsoft Partner ID or MPN ID.
