Type:	4. Instruction	Version:	1.0
Status:	Final	Effective:	5/24/2023

4. Definitions

Term	Definition
Directory ID	See Microsoft ID
GUID	A globally unique identifier (GUID) is a 16 byte, or a 128 bit integer that can be used across all computers and networks wherever a unique identifier is required. Such a number has a very low probability of being duplicated. It is formatted like "12345678-BBBb-cCCCC-0000-123456789012"
Microsoft ID	The globally unique identifier (GUID) of a Microsoft customer. Also referred to as a Tenant ID or Directory ID. For a provider, the Microsoft ID required is the ID of the tenant used to manage the end user subscriptions. A provider may have multiple Microsoft ID's; however, only the one will work for this purpose.
Microsoft Partner Number (MPN)	A unique identifier of a Microsoft partner in the Microsoft Partner Network (MPN). A company may have multiple MPN's but the one associated with CSP is the one required. The correct name is Microsoft Partner ID or MPN ID.
Tenant ID	See Microsoft ID
