3.8.	Removing the Foreign Principal	4
3.9.	Finding the AdminAgents Object Id for the Reseller Account	6
4.0	Associated Documents.....	6
5.0	Document Approval.....	7
6.0	Document Revision History	7

3.0 Instructions

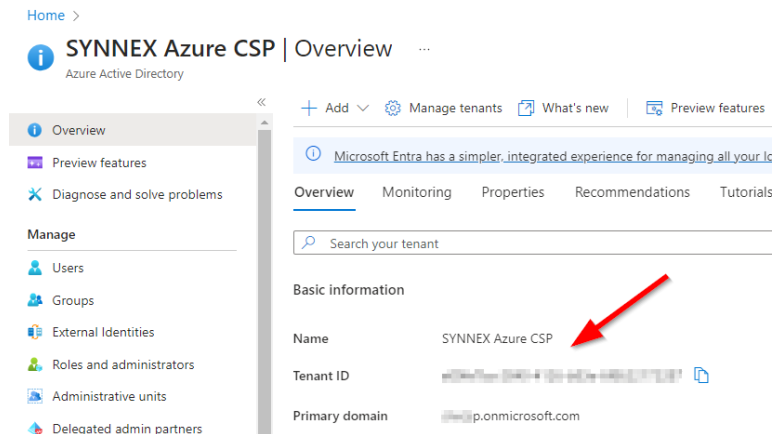

3.1. Obtaining a Partner's Microsoft Id and MPN from Partner Center

The Partner's Microsoft Id and MPN number are needed for a number of operations. If the Partner does not know what they are, they can find them in Partner Center.

See the document "Tech Note – Finding Provider's Microsoft ID" for instructions.

3.2. Obtaining the Tenant Id and Primary Domain Name from Azure

- Log into the customer's [Azure portal](#)
- Navigate to the [Azure Active Directory](#) blade then to Overview
- To the right of the menu, locate the section called Basic information

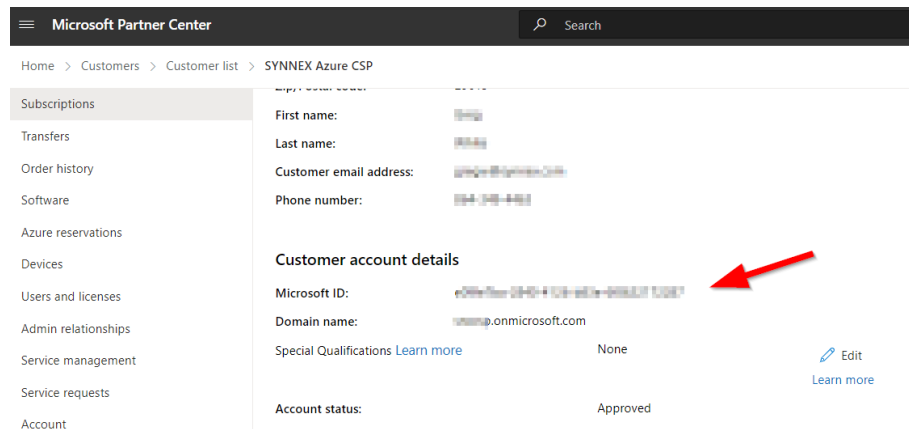

- The Tenant Id is located under Tenant ID:
- The Primary domain name is located under Primary domain:

Note: A tenant may have multiple domain names. When engaging with Synnex providing the primary domain name will expedite assistance.

3.3. Obtaining the Tenant Id and Primary Domain Name from Partner Center

- Log into [Partner Center](#)
- Locate the customer under [Customers](#)
- Click on Account

- The Tenant Id is located under Customer Account Details -> Microsoft ID:
- The Primary domain name is located under Domain name:

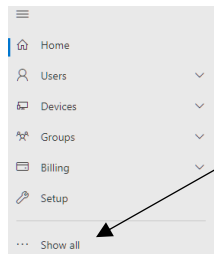

Note: A tenant may have multiple domain names. When engaging with Synnex providing the primary domain name will expedite assistance.

3.4. Establishing Granular Delegated Administration Permissions

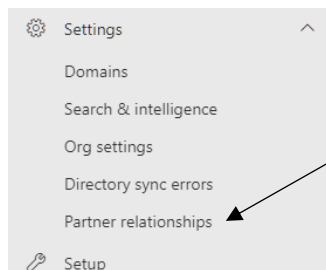

- Granular Delegated Administration Permissions (GDAP) for TD SYNEX are requested from the TD SYNEX eCommerce platforms. Please contact your TD SYNEX Account Manager for more information on GDAP.

3.5. Removing Granular Delegated Administration Permissions

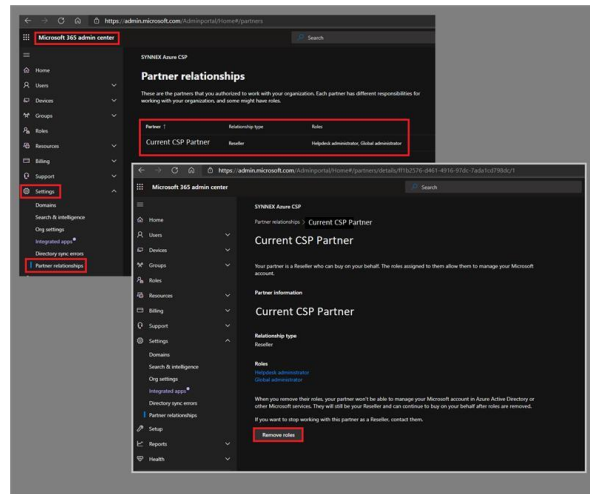

- GDAP is managed from the Microsoft 365 admin center.
- In [admin center](#), expand Settings from the menu. Note: You may have to click Show all for Settings to appear.

- Select [Partner relationships](#) from the menu

- Click on the partner to remove then click the Remove roles button.

CAUTION: Do not remove the current CSP Reseller or CSP Provider as may affect your subscriptions and costs.

3.6. Establishing TD Synnex's Foreign Principal (Administration on Behalf Of)

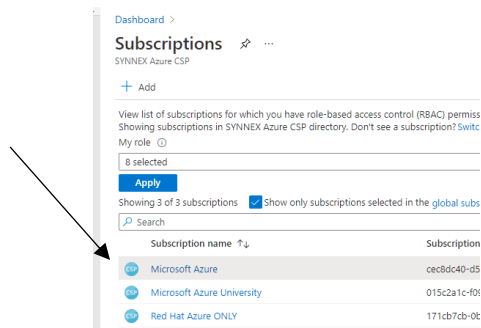

- See the tech note titled: "Tech Note - Add AOBO to Subscription for TDS"

3.7. Establishing the Reseller's Foreign Principal

- See the tech note titled: "Tech Note - Add AOBO to Subscription for Resellers"

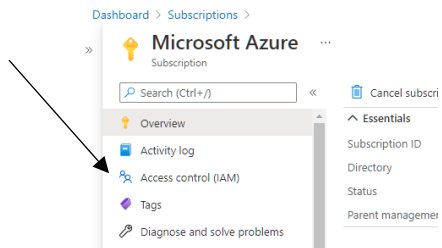

3.8. Removing the Foreign Principal

- A user with Owner RBAC right to the subscription will need to complete the following steps for each subscription.
- Navigate to the Subscriptions blade in the [Azure Portal](#)
- Click on the Subscription that contains the foreign principal to remove

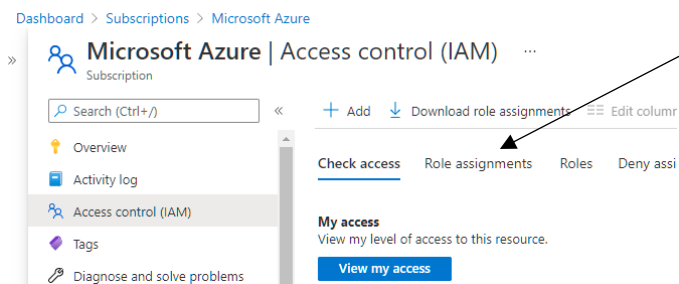

- Click on Access Control (IAM)

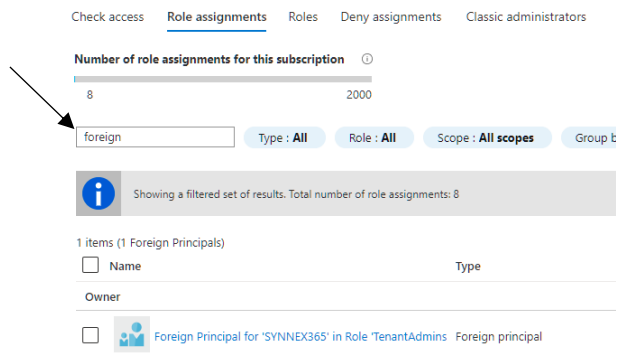

Common Reseller Activities

- Click on Role assignments

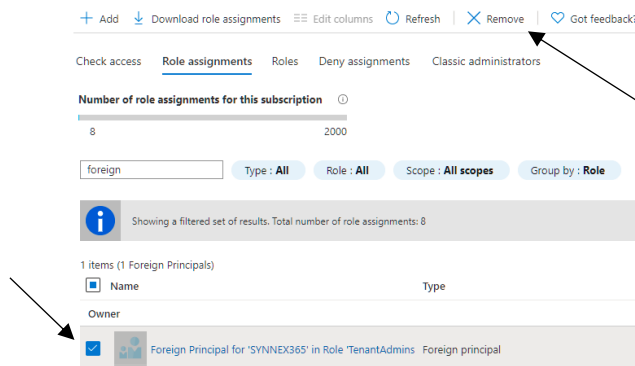

- In the search box, enter foreign to filter on just foreign principals

- There may be multiple foreign principals listed. Check the box by the one to be removed, then click Remove.

CAUTION: Do not remove the current CSP Provider. Removing the current provider may affect support and cost.

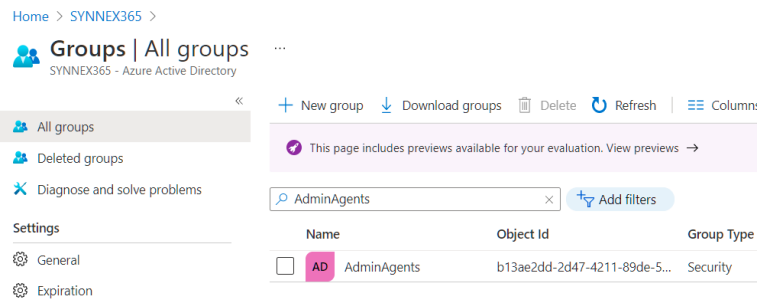

3.9. Finding the AdminAgents Object Id for the Reseller Account

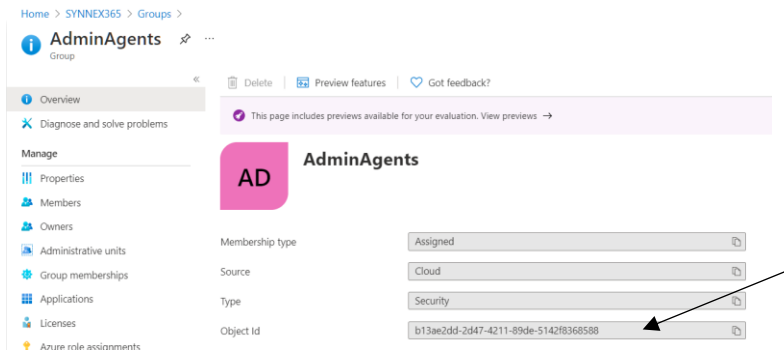

For the reseller to establish a foreign principal in their customers' tenants, they will need to determine the object Id of their AdminAgents group. The AdminAgents group will exist only in the reseller tenant associated with CSP.

After getting the object Id, the reseller may then use the PowerShell script or Stellr portal to add their foreign principal.

- Log into the [Azure portal](#) for the reseller tenant
- Navigate to the [Azure Active Directory](#) blade then to Overview
- Click on [Groups](#)
- Search for a group called AdminAgents

- Click on the group name
- The object Id will be listed on the Overview tab

4.0 Associated Documents

- [Azure plan - Manage subscriptions & resources - Partner Center | Microsoft Learn](#)
- [Assign Azure roles using Azure PowerShell - Azure RBAC | Microsoft Learn](#)
