

1. Purpose

Define the process for an end user or reseller to cancel an Azure Plan CSP subscription in the Azure portal. Resellers may also cancel subscriptions from the Stellr portal; however, there are different requirements.

IMPORTANT: Canceling a subscription causes all resources to stop immediately. Virtual machines are de-allocated, IP addresses are freed, etc. Canceling a subscription IS service affecting.

3. Procedure

3.1. Prerequisites / Notes

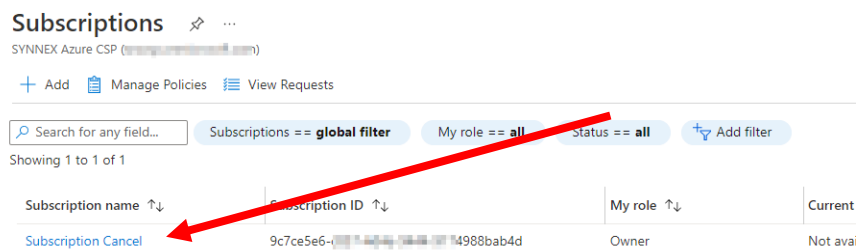

- The user who cancels a subscription must be an Owner of the subscription. No Azure Active Directory roles are required.
- When a subscription is canceled, it will exist in an inactive state for 30-90 days. During this time, it can be reactivated; however, no charges are incurred while inactive. After 30-90 days, it will automatically delete without notice.
- Although not required, Microsoft recommends you take the following actions before canceling the subscription:
 - Back up your data. For example, if you're storing data in Azure storage or SQL, download a copy. If you have a virtual machine, save an image of it locally.
 - Shut down your services. Go to the resources page in the management portal, and Stop any running virtual machines, applications, or other services.
 - Consider migrating your data.
 - Delete all resources and all resource groups.
 - If you have any custom roles that reference this subscription in AssignableScopes, you should update those custom roles to remove the subscription. If you try to update a custom role after you cancel a subscription, you might get an error.

3.2. Canceling from Azure Portal

- Log into the [Azure portal](#) using a login that has Owner RBAC permissions.
- Navigate to the Subscriptions blade by searching for Subscription then click on the Subscriptions key icon.

- In the list of Subscriptions, click on the Subscription name you want to cancel.

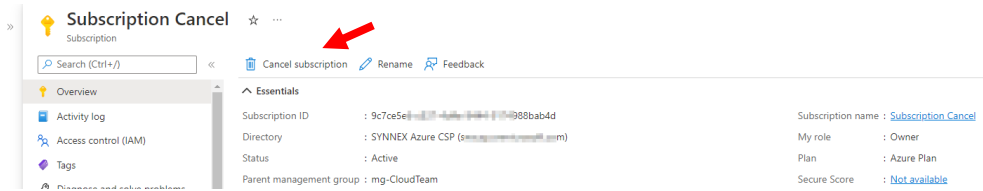

- Confirm you are in the right subscription, then click Cancel subscription on the Overview page.

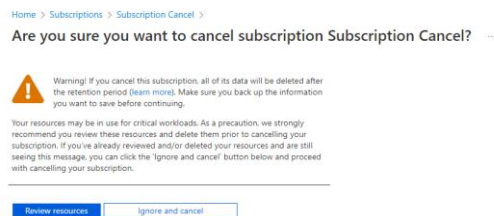

End User / Reseller Canceling CSP Subscriptions

Type:	3. Procedure	Version:	2.0
Status:	Final	Effective:	12/10/2023

- If any resources are present in the subscription, you will be offered the change to review them before canceling or you may ignore the warning and cancel anyway.

- If there are no resources or if you choose to ignore the warning, you will be asked to enter the subscription name and a reason. After you select both, the Cancel subscription button will be enabled.

--More Detail--

Cancel subscription

- Click the Cancel subscription button. You will be notified when the cancellation is complete.

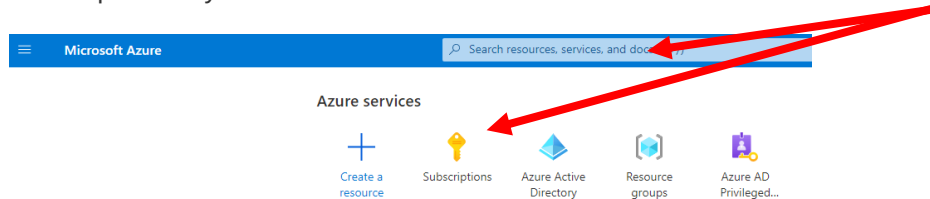

- The status of the subscription will change to Disabled, all resources are stopped and no new charges will be incurred. Charges for resources in use prior to the cancellation will be invoiced in the appropriate cycle.

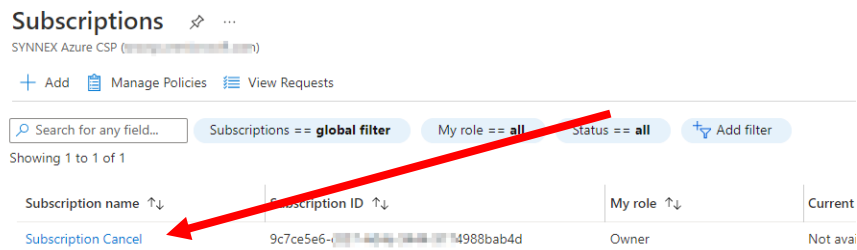

- Notify your TD Synnex Account Manager that you canceled the subscription.

3.3.Reactivating from Azure Portal

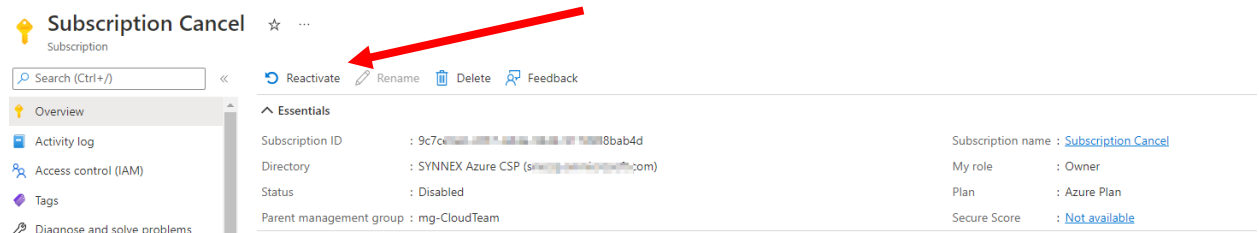

- Log into the [Azure portal](#) using a login that has Owner RBAC permissions.
- Navigate to the Subscriptions blade by searching for Subscription then click on the Subscriptions key icon.

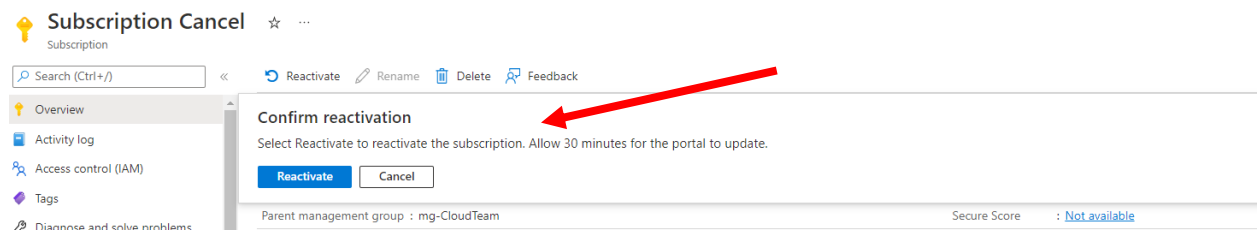

- In the list of Subscriptions, click on the Subscription name you want to reactivate.

- Click on Reactivate

- Confirm reactivation

- You will receive a confirmation when reactivation is completed.

Successfully reactivated the subscription

We've successfully reactivated your subscription.
However, it can take up to 30 mins for the changes to be reflected in the portal.

- After the subscription is reactivated, charges for resources will start. You may have to re-start some resources.
- Notify your TD Synnex Account Manager that you reactivated the subscription.
