## 3. Instructions

### 3.1. Combined TD SYNnex and Reseller

**IMPORTANT:** The reseller must have a partner relationship with the TD SYNnex partner center before a combined link can be created.

- Log into [Partner Center](#)
- Navigate to [Customers](#)

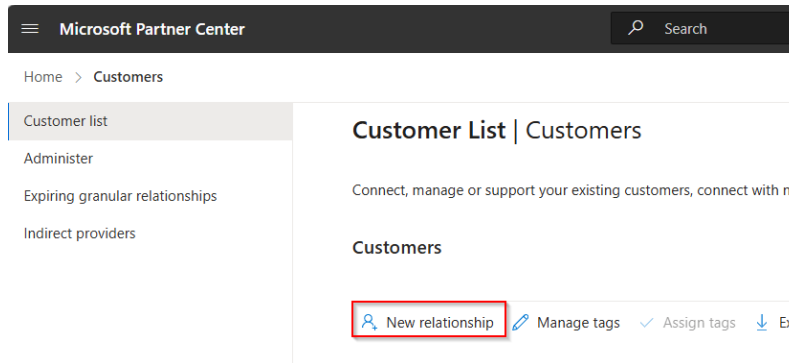

- Click on New [Relationship](#)

# Establishing a Reseller Relationship

Dear valued customer,

My company, TD SYNEX Reseller offers SYNEX Corporation's cloud solutions. I'm writing to invite you to subscribe SYNEX Corporation's solutions through TD SYNEX Reseller.

Follow the link below to accept this offer and to authorize TD SYNEX Reseller as your official local reseller.

<https://admin.microsoft.com/Adminportal/Home?invType=IndirectResellerRelationship&partnerId=cab0-11bbe15c5168&msppId=68-53&indirectCSPId=ff1b251da1cd798dc#/BillingAccounts/partner-invitation>

Note: User with Global Admin permission is required to accept relationship. Customer address must be completed first (<https://admin.microsoft.com/Adminportal/Home?#/BillingAccounts/billing-accounts>) before using the acceptance link above.

Thank you for the opportunity to serve you.

- A global administrator who is a member of the end user tenant must follow the link to complete the relationship.
- After the link is accepted, the end user tenant will appear in the indirect provider's and reseller's Partner Center.

## 4. Errors

- The end user must accept the Microsoft Customer Agreement in order to purchase licenses or subscriptions.
- The end user company information must be completed in the M365 admin center
- The end user address must be less than 128 characters in the company information.

## 5. Removing Reseller Relationships

**IMPORTANT:** The guidelines for removing reseller relationships are established by Microsoft and cannot be altered by TD SYNEX. We do not have the ability to override these policies or provide workarounds. If a customer requires changes to these rules, they should contact Microsoft directly for assistance.

### 5.1. What is a "Reseller Relationship"

A reseller relationship is established when a customer grants a Cloud Solution Provider (CSP) reseller the ability to transact and manage subscriptions on their behalf through the Microsoft Partner Center. This relationship is primarily commercial, enabling the reseller to provision, bill, and support Microsoft cloud services for the customer.

#### Key Characteristics:

- It is created when the customer accepts the reseller's invitation in Partner Center.
- It allows the reseller to sell and manage licenses/subscriptions but **does not** grant administrative access to the customer's Azure AD tenant or resources.
- The reseller cannot sign in to the customer's tenant unless separate granular delegated admin privileges (GDAP) and/or AOBO permissions are explicitly granted.

# Establishing a Reseller Relationship

|         |                 |            |            |
|---------|-----------------|------------|------------|
| Type:   | 4. Instructions | Version:   | 3.0        |
| Status: | Final           | Effective: | 12/17/2025 |

- The customer has the ability to terminate GDAP and AOBO without action from the reseller or TD SYNEX.

## 5.2. Removing TD SYNEX's reseller relationship

- **Only TD SYNEX can remove its reseller relationship.** Partners must submit a request through their TD SYNEX account manager to initiate the removal process.
- **The customer must have no active subscriptions** of any type purchased thru TD SYNEX, including Azure services, Microsoft 365 (Modern Workplace), or software licenses.
- **If the customer is purchasing subscriptions through another TD SYNEX reseller, the relationship cannot be removed.** TD SYNEX cannot disclose information about other resellers engaged with the customer.
- If the customer has ever purchased a CSP perpetual software license through TD SYNEX, the reseller relationship cannot be removed.

## 5.3. Removing the Reseller's reseller relationship

- **Only the reseller can remove their reseller relationship with the customer.** TD SYNEX has no access to remove the reseller's relationship.
- If the reseller's relationship was established using the multichannel process above, TD SYNEX must remove their reseller relationship prior to the reseller removing their relationship.
- If the reseller's relationship was established using the multichannel process above and TD SYNEX is unable to remove TD SYNEX's relationship, then the reseller will not be able to remove the reseller's relationship.

## 6. Definitions

| <b>Term</b>          | <b>Definition</b>                                                                                                                                                                                                                                            |
|----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| AOBO                 | Admin-on-behalf-Of is a capability that allows a CSP partner to perform administrative tasks on behalf of a customer within the customer's Azure environment.                                                                                                |
| End User             | The ultimate consumer of Azure and MWP subscriptions and services.                                                                                                                                                                                           |
| GDAP                 | GDAP (Granular Delegated Admin Privileges) is a security model in the Microsoft Cloud Solution Provider (CSP) program that allows partners to request specific, time-bound administrative permissions in a customer's Microsoft Entra ID tenant              |
| Indirect Provider    | An indirect provider in Microsoft Azure is a partner that purchases cloud solutions from Microsoft to resell to indirect resellers, offering them support services like customer assistance, billing, and pricing.                                           |
| Partner Center       | The Microsoft Azure Partner Center is a platform that streamlines business processes for partners, enabling them to manage their accounts, engage with customers, co-sell with Microsoft, and access a range of tools and resources for business growth.     |
| Partner Relationship | A partner relationship is a connection between an indirect reseller and an indirect provider. It provides authorization of an indirect provider partnership and allows their full access to submit orders and add subscriptions on behalf of your customers. |

# Establishing a Reseller Relationship

|         |                 |            |            |
|---------|-----------------|------------|------------|
| Type:   | 4. Instructions | Version:   | 3.0        |
| Status: | Final           | Effective: | 12/17/2025 |

|                       |                                                                                                                                                                                                                 |
|-----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reseller              | An indirect reseller in Microsoft Azure is a partner that sells Microsoft cloud solutions to customers by collaborating with an indirect provider, without having a direct billing relationship with Microsoft. |
| Reseller Relationship | A reseller relationship allows the provider to sell Microsoft cloud subscriptions and services to end user customers. It does not provide access to the end user's environment.                                 |

## 10. Appendix A – Reseller Only Relationship

Due to changes in the Microsoft partner of record requirement, a reseller only or TD SYNnex only relationship is no longer recommended. Not using the combined link can affect incentives earned by the reseller.

- Log into [Partner Center](#)
- Navigate to [Customers](#)

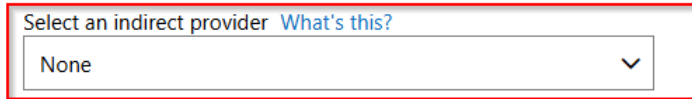

- Click on New [Relationship](#)

- To establish a reseller relationship for the reseller only, leave the indirect provider set to "None"

## Customer list | Request a reseller relationship

Invite the customer to authorize you as their local reseller of record. When the customer follows the link in your email account. [Learn more](#)

The screenshot shows a dropdown menu titled 'Select an indirect provider' with a link 'What's this?'. The dropdown is open, showing a single option 'None' which is highlighted with a red box.

- You may copy the entire email provided and send it to your customer.

Email text

Note: User with Global Admin permission is required to accept relationship. Customer address must be completed first (<https://admin.microsoft.com/Adminportal/Home?#/BillingAccounts/billing-accounts>) before using the acceptance link above.
